NYS NIBRS Error Messages and Explanations

New York State National Incident Based Reporting System (NIBRS)

This document provides a detailed listing of all errors that could occur within a monthly NYS NIBRS file upon submission to the DCJS IBR Database. The listing includes each error number, the corresponding error message, and a detailed explanation of the error. This document is intended primarily as a reference for law enforcement agencies that receive errors on their NYS NIBRS Submission Transaction Report and need further assistance in correcting them.

NYS NIBRS Error Messages & Explanations

100 Incident not processed due to invalid segment length

Each segments length must equal the sum of required Data Specifications. If the specified number of characters is not input, and the sum of the characters in the segment will not equal the expected value, and the incident will not process.

ADMINISTRATIVE SEGMENT

The Administrative Segment includes 11 data capture elements and 4 data transmission elements. The sum of the character requirements of each data element totals to 84. If any data element in the Administrative Segment is greater than or less than the required data length, the sum of the characters will not equal 84, and the incident will not process.

<u>DATA ELEMENT</u>	<u>DATA LENGTH</u>
Segment Type	1 character
Segment Action	1 character
IBR Month	2 characters
IBR Year	4 characters
ORI Number	9 characters
Incident/Complaint Number	12 characters
Incident Occurrence Date	8 characters
Incident Occurrence Time	4 characters
Incident Report Date	8 characters
Incident Time Reported	4 characters
Incident Case Status	2 characters
Incident Exceptional Clearance Date	8 characters
Location Code of Incident	4 characters
Station/Division/Precinct Identifier	6 characters
Bias Crime Type 1	2 characters
Bias Crime Type 2	2 characters
Bias Crime Type 3	2 characters
Bias Crime Type 4	2 characters
Bias Crime Type 5	2 characters
Cargo Theft Indicator	1 character

The sum of the data lengths = 1 + 1 + 2 + 4 + 9 + 12 + 8 + 4 + 8 + 4 + 2 + 8 + 4 + 6 + 2 + 2 + 2 + 2 + 2 + 1 = 84

EXAMPLE: If the Station/Division/Precinct Identifier is longer than 6 characters, the segment will violate the segment length and cause error #100. Alternately, if the Station/Division/Precinct Identifier is less than 6 characters and the RMS does not designate the number of spaces to offset the difference, the segment will violate the required segment lengths and cause error #100.

101 At least one of the fields in a segment did not match the expected data type

Each data element in a segment must contain the expected characters and/or the specified formats per the *NYS NIBRS Data Element and File Structure Specifications*.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

102 Date must be formatted as YYYYMMDD

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	09
DD	Two-digit day, e.g.,	30

Thus, the date of September 30, 2029, would appear as 20290930.

104 Month must be in range of 01 to 12

Month must be 2 numeric digits ranging from 01 for January to 12 for December.

106 Day of the month must be valid for that month

September, April, June, and November must be between 01 and 30. January, March, May, July, August, October, and December must be between 01 and 31. February must be between 01 and 28 with an exception for leap year when it is between 01 and 29.

108 IBR MONTH on each segment must be the same as on header segment

IBR MONTH identifies the monthly data submission expected by DCJS for sequential processing. It is normally the month just completed and is to be submitted within 30 days of month's end. Enter the month being submitted from 01 – 12, e.g., 09 = September.

The header is the required first line of every monthly NYS NIBRS submission file. It contains all data required to identify the agency and the month that it is submitting. Each incident in the file will contain several segments. The number and type of segments may vary depending on the crime circumstances, but each segment must start with the same IBR MONTH as the header.

See Transmission Data Element TD#4 IBR MONTH.

110 IBR YEAR on each segment must be the same as on header segment

IBR YEAR identifies the four-digit year (YYYY) corresponding to the IBR MONTH. Enter the correct year of file submission.

The header is the required first line of every monthly NYS NIBRS submission file. It contains all data required to identify the agency and the month that it is submitting. Each incident in the file will contain several detail segments. The number and type of segments varies depending on crime circumstances, but each IBR YEAR must be the same as the IBR YEAR in the header.

See Transmission Data Elements TD#5 IBR YEAR and TD#4 IBR MONTH.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

112 FILE CREATION DATE must be later than the IBR MONTH submitted

The NYS NIBRS monthly submission file is created by your agency on the FILE CREATION DATE. It must show that it was created at least one day after the end of the month shown in the IBR MONTH which is being submitted to DCJS. For example, the earliest possible FILE CREATION DATE for a submission file of April 2029 crime and arrest data is May 1, 2029. The date must be formatted as YYYYMMDD.

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	05
DD	Two-digit day, e.g.	01

The FILE CREATION DATE May 1, 2029 would appear as 20290501.

See Transmission Data Elements TD#3 FILE CREATION DATE and TD#4 IBR MONTH.

114 IBR MONTH on header segment must be in range of 01 to 12

IBR MONTH identifies the month of the data submitted to DCJS. It is normally the month just completed and is to be submitted within 30 days of month's end. Enter the month being submitted from 01 – 12, e.g., 09 = September.

The header is the required first line of every monthly NYS NIBRS submission file. It contains the Segment Type, Segment Action, IBR Month, IBR Year, file creation date and agency ORI.

See Transmission Data Element TD#4 IBR MONTH.

116 IBR MONTH on header segment must be the next month expected for IBR processing

IBR MONTH identifies the monthly data submission expected by DCJS for sequential processing. It is normally the month just completed and is to be submitted within 30 days of the new month's end (i.e., the submission file for July is due August 31). Enter the month being submitted from 01 – 12, e.g., 09 is September.

EXAMPLE: The August submission (IBR MONTH is 08) must be sent to DCJS and processed before the September submission (IBR MONTH is 09) can be processed.

The header is the required first line of every monthly NYS NIBRS submission file. It contains the Segment Type, Segment Action, IBR Month, IBR Year, file creation date and agency ORI.

See Transmission Data Element TD#4 IBR MONTH.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

118 IBR YEAR on header segment must be the next year expected for IBR processing

IBR YEAR identifies the four-digit year (YYYY) corresponding to the IBR MONTH submitted. It must be the year expected by DCJS for sequential processing and is normally the month just completed. It must be submitted within 30 days of the new month's end (e.g., the submission file for July is due August 31).

EXAMPLE: The December 2029 submission (IBR MONTH is 12 and IBR YEAR is 2029) must be sent to DCJS and processed before the January 2030 (IBR MONTH is 01 and IBR YEAR is 2030) submission can be processed.

The header is the required first line of every monthly NYS NIBRS submission file. It contains the Segment Type, Segment Action, IBR Month, IBR Year, file creation date and agency ORI.

See Transmission Data Element TD#5 IBR YEAR.

120 FILE CREATION DATE must be a valid date and format

FILE CREATION DATE is the date that the NYS NIBRS monthly file for submission was created by your agency. It must be a valid calendar date and correctly formatted as YYYYMMDD.

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	09
DD	Two-digit day, e.g.,	30

The FILE CREATION DATE September 30, 2029 would appear as 20290930.

See Transmission Data Element TD#3 FILE CREATION DATE.

122 ORI NUMBER must be a valid ORI NUMBER on DCJS IBR Agency File

Enter the 9-character NCIC Originating Agency Identifier (ORI) Number which has been assigned to your agency. It must be a currently active ORI NUMBER in the DCJS file of NYS NIBRS agencies. If your agency has more than one active ORI, check with the DCJS Crime Reporting Unit to verify which ORI should be used.

See Data Element #1 ORI NUMBER.

124 Header segment must be the first record on submission file

The header is the required first line of every monthly NYS NIBRS submission file. It contains the Segment Type, Segment Action, IBR Month, IBR Year, file creation date and agency ORI. The Header Segment must be the first record read by DCJS when the file is uploaded in eJustice.

See Transmission Data Elements TD#1 SEGTYPE and TD#2 SEGACT. The Header appears at the beginning of each.

126 Header segment appears out of sequence; it must be the first record on submission file

The header is the required first line of every monthly NYS NIBRS submission file. It contains all data required to identify the agency and the month that it is submitting. A trailer segment is the required final line of a submission file. Normally each month's data must be submitted within 30 days of month's end.

See Transmission Data Elements TD#1 SEGTYPE and TD#2 SEGACT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

128 Trailer segment must be the last record on submission file

The trailer is the required final line of every monthly NYS NIBRS submission file. It signifies the end of the file and contains all data required to determine if there was any data transmission problem.

See Transmission Data Elements TD#1 SEGTYPE and TD#2 SEGACT.

130 Trailer segment appears out of sequence; it must be the last record on submission file

The trailer is the required final line of every monthly NYS NIBRS submission file. It signifies the end of the file and contains all data required to determine if there was any data transmission problem. It may immediately follow a header segment or a detail segment type 1 through 8. It may not follow another trailer.

See Transmission Data Elements TD#1 SEGTYPE and TD#2 SEGACT.

132 RECORD COUNT on trailer must match the count calculated by DCJS upon receipt of file

RECORD COUNT is the number of segments transmitted in an agency's monthly data submission. It does not count header or trailer segments. Instead, it counts only the number of detail records (segments 1 - 8) of a data submission. Each incident following the header in the file contains several detail segments which vary depending on the crime circumstances.

The RECORD COUNT, first calculated by the contributing agency for transmission, is re-calculated by DCJS upon receipt of the file. Any difference between the two totals indicates a data transmission problem and results in DCJS rejection of the submission file.

See Transmission Data Element TD#8 RECORD COUNT.

134 HASH TOTAL (computer calculation) on trailer record implies data is missing or corrupted

HASH TOTAL is calculated by adding together the values of each detail segment contained in an agency's monthly data submission. The header and trailer segments are not included in this addition. Hash looks within the detail records and adds up the number of offenses, number of victims, number of weapons, etc. contained in them.

Hash is first calculated by the contributing agency for transmission and is re-calculated by DCJS software upon receipt. Any difference indicates a data transmission problem, and the file is rejected. The same total on both ends indicates that DCJS received the complete file sent by the agency.

See Transmission Data Element TD#9 HASH TOTAL.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

136 ORI NUMBER on each segment must be the same as on header segment

ORI NUMBER must be the 9- character NCIC Originating Agency Identifier (ORI) Number which has been assigned to your agency. It must also be a currently active ORI NUMBER in the DCJS file of NYS NIBRS agencies. If your agency has more than one active ORI, check with the DCJS Crime Reporting Unit to verify which ORI should be used.

The header is the required first line of every monthly NYS NIBRS submission file. It contains the Segment Type, Segment Action, IBR Month, IBR Year, file creation date and agency ORI. Every file segment must contain the same ORI NUMBER.

See Data Element #1 ORI NUMBER.

138 INCIDENT/COMPLAINT NUMBER must be left justified

INCIDENT/COMPLAINT NUMBER is your agency-defined number, up to 12 characters, which uniquely identifies each reported incident. The first character of the INCIDENT/COMPLAINT NUMBER must be left justified meaning it cannot be a blank space.

See Data Element #2 INCIDENT/COMPLAINT NUMBER.

140 INCIDENT/COMPLAINT NUMBER cannot be blank or have embedded blanks

INCIDENT/COMPLAINT NUMBER is your agency-defined number, up to 12 characters, which uniquely identifies each reported incident. Each incident must be assigned a unique number using the agency's numbering system.

See Data Element #2 INCIDENT/COMPLAINT NUMBER.

142 Use allowed characters for INCIDENT/COMPLAINT NUMBER: A-Z, 0-9, hyphens, blank right-fill

INCIDENT/COMPLAINT NUMBER is the local agency-defined number, up to 12 characters, which uniquely identifies each reported incident. Valid character combinations include letters A-Z, numbers 0-9, hyphen, and/or blank right-fill. While incident numbers with blanks in the middle are rejected, incident numbers with blanks to the right following the last number or letter are valid.

See Data Element #2 INCIDENT/COMPLAINT NUMBER.

144 INCIDENT OCCURRENCE DATE must be formatted as YYYYMMDD

INCIDENT OCCURRENCE DATE is the year, month, and day when the incident occurred or the beginning of the time period in which it started (when appropriate). It may occasionally be entered as Not Reported or Unknown; but whenever known, it must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	09
DD	Two-digit day, e.g.,	25

The INCIDENT OCCURRENCE DATE September 25, 2029 would appear as 20290925.

See Data Element #3, INCIDENT OCCURRENCE DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

150 INCIDENT OCCURRENCE DATE must be prior to the FILE CREATION DATE

INCIDENT OCCURRENCE DATE is the year, month, and day when the incident occurred or the beginning of the time period in which it started (when appropriate). It may occasionally be entered as Not Reported or Unknown; but whenever known, it must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

FILE CREATION DATE is the date that the NYS NIBRS monthly file was created by your agency for submission to DCJS. It must show that the file was created at least one day after the end of the month shown in IBR MONTH which is being submitted to DCJS. It must be a valid calendar date and correctly formatted as YYYYMMDD.

EXAMPLE: The submission file for March must contain no incident dates after March 31. It must be created on April 1 or thereafter.

See Data Element #3 INCIDENT OCCURRENCE DATE, and Transmission Data Element TD#3 FILE CREATION DATE.

152 INCIDENT OCCURRENCE TIME must be stated as military time

INCIDENT OCCURRENCE TIME is the time when the incident started. If known, it must be entered as a valid military time (24-hour clock) in HHMM format. Hours (HH) range from 00 to 23, and minutes (MM) range from 00 to 59. Midnight is 0000, and there is no 2400. INCIDENT OCCURRENCE TIME may occasionally be entered as Not Applicable (7777), Not Reported (8888), or Unknown (9999).

See Data Element #4 INCIDENT OCCURRENCE TIME.

153 INCIDENT REPORT DATE must be formatted as YYYYMMDD

INCIDENT REPORT DATE is the date on which the incident was reported to police. In most cases this will be the same as the INCIDENT OCCURRENCE DATE. If the incident occurred over several days, the INCIDENT REPORT DATE will serve as a delimiter for the end of the incident. It must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	10
DD	Two-digit day, e.g.,	31

This INCIDENT REPORT DATE of October 31, 2029 would appear as 20291031.

See Data Element #5 INCIDENT REPORT DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

154 Unless incident is a Time Window, year of INCIDENT REPORT DATE must be 1991 or later

INCIDENT REPORT DATE is the date on which the incident was reported to police.

The INCIDENT REPORT DATE of an active incident must be on or after the start-up date for the State NYS NIBRS program. The only way that NYS NIBRS can process an incident that occurred prior to 1991 is if the local agency submits it as a Time Window or an update to an existing Time window.

Time Window is considered an inactive incident by NYS NIBRS. Only limited data is accepted, and only the following segments are allowed: Exceptional Clearance Only, Recovered Property Only, Arrest Only, Exceptional Clearance with Recovered Property, or Arrest with Recovered Property.

See Data Element #5 INCIDENT REPORT DATE, and Transmission Data Elements TD#2 SEGACT and TD#6 TIME WINDOW TYPE.

156 INCIDENT REPORT DATE must be on or after NIBRS start-up date for NIBRS submission by the agency

INCIDENT REPORT DATE is the date on which an incident was reported to police. All active incidents must have an INCIDENT REPORT DATE on or after the start-up date for NIBRS submission by the local agency. INCIDENT REPORT DATE must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	03
DD	Two-digit day, e.g.,	15

This INCIDENT REPORT DATE of March 15, 2029 would appear as 20290315. It would be valid for an agency whose NIBRS start-up date was on or before March 1, 2029 (NIBRS start-up is always the first of the month).

See Data Element #5 INCIDENT REPORT DATE.

158 INCIDENT REPORT DATE must be prior to the FILE CREATION DATE

The INCIDENT REPORT DATE is the date on which the incident was reported to police.

The FILE CREATION DATE is the date that the monthly submission file was created by the local agency. It must show that it was created at least one day after the end of the IBR MONTH which is being submitted to DCJS. Therefore, a submission file created on May 1st must contain no incidents reported to police after April 30.

See Data Element #5 INCIDENT REPORT DATE and Transmission Data Element TD# 3 FILE CREATION DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

160 INCIDENT REPORT DATE must be on or after INCIDENT OCCURRENCE DATE

The INCIDENT REPORT DATE is the date on which the incident was reported to police.

The INCIDENT OCCURRENCE DATE is the date on which the incident occurred, or the beginning of the time period in which it started (when appropriate).

If the INCIDENT OCCURRENCE DATE does not equal Not Reported (88888888) and does not equal Unknown (99999999), then the INCIDENT REPORT DATE must be on or after the INCIDENT OCCURRENCE DATE.

See Data Elements #3 INCIDENT OCCURRENCE DATE and #5 INCIDENT REPORT DATE.

162 INCIDENT TIME REPORTED must be stated as military time

INCIDENT TIME REPORTED is the time when the incident was reported to police. If known, it must be entered as a valid military time (24-hour clock) in HHMM format. Hours (HH) range from 00 to 23, and minutes (MM) range from 00 to 59. Midnight is 0000, and there is no 2400. INCIDENT TIME REPORTED may occasionally be entered as Not Applicable (7777), Not Reported (8888), or Unknown (9999).

See Data Element #6 INCIDENT TIME REPORTED.

164 Enter a valid case status to indicate INCIDENT CASE STATUS

INCIDENT CASE STATUS field must contain a valid NYS NIBRS case status as of the end of the report month.

01 = Cleared by Arrest-Adult
02 = Cleared by Arrest-Juvenile
10 = Death of Offender
11 = Prosecution Declined
12 = Extradition Denied
13 = Victim Refuses to Cooperate
14 = No Court Referral (Juvenile Only)
20 = Warrant Issued
21 = Investigation Pending
22 = Closed
88 = Not Reported
99 = Unknown

See Data Element #7 INCIDENT CASE STATUS.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

166 INCIDENT EXCEPTIONAL CLEARANCE DATE requires a clearance by exceptional means in INCIDENT CASE STATUS

The INCIDENT EXCEPTIONAL CLEARANCE DATE is the date on which an incident was cleared by exceptional means. It must be a valid calendar date and correctly formatted as YYYYMMDD.

The corresponding INCIDENT CASE STATUS field must contain a matching status that reflects a clearance by exceptional means.

- 10 = Death of Offender
- 11 = Prosecution Declined
- 12 = Extradition Denied
- 13 = Victim Refuses to Cooperate
- 14 = No Court Referral (Juvenile Only)

If a subsequent arrest update changes the case status from an exceptional clearance to an arrest clearance, the INCIDENT EXCEPTIONAL CLEARANCE DATE must also be updated to Not Applicable (77777777).

See Data Elements #7 INCIDENT CASE STATUS and #8 INCIDENT EXCEPTIONAL CLEARANCE DATE.

168 INCIDENT EXCEPTIONAL CLEARANCE DATE of Not Applicable requires a clearance by other than exceptional means in INCIDENT CASE STATUS

The INCIDENT EXCEPTIONAL CLEARANCE DATE is the date an incident is cleared by exceptional means. If the INCIDENT EXCEPTIONAL CLEARANCE DATE is Not Applicable, the corresponding INCIDENT CASE STATUS field must NOT equal one of the following Exceptional Clearance types

- 10 = Death of Offender
- 11 = Prosecution Declined
- 12 = Extradition Denied
- 13 = Victim Refuses to Cooperate
- 14 = No Court Referral (Juvenile Only)

If a subsequent update changes the case status to an exceptional clearance, the INCIDENT EXCEPTIONAL CLEARANCE DATE must also be updated to a valid calendar date and correctly formatted as YYYYMMDD.

See Data Elements #7 INCIDENT CASE STATUS and #8 INCIDENT EXCEPTIONAL CLEARANCE DATE.

170 INCIDENT EXCEPTIONAL CLEARANCE DATE must be a valid date or Not Applicable

The INCIDENT EXCEPTIONAL CLEARANCE DATE is the date on which an incident was cleared by exceptional means. If the incident was not cleared by exceptional means, enter Not Applicable. If a date is entered, it must be a valid calendar date and correctly formatted as YYYYMMDD.

- | | | |
|------|------------------------|------|
| YYYY | Four-digit year, e.g., | 2029 |
| MM | Two-digit month, e.g., | 04 |
| DD | Two-digit day, e.g., | 02 |

The INCIDENT EXCEPTIONAL CLEARANCE DATE April 2, 2029 would appear as 20290402.

Alternately the INCIDENT EXCEPTIONAL CLEARANCE DATE may equal Not Applicable (77777777)

See Data Element #8 INCIDENT EXCEPTIONAL CLEARANCE DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

172 INCIDENT EXCEPTIONAL CLEARANCE DATE must be on or after NIBRS start-up date

The INCIDENT EXCEPTIONAL CLEARANCE DATE is the date on which an incident was cleared by exceptional means. It must be on or after the start-up date for NIBRS submission by the local agency. It must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

See Data Element #8 INCIDENT EXCEPTIONAL CLEARANCE DATE.

174 INCIDENT EXCEPTIONAL CLEARANCE DATE must be prior to FILE CREATION DATE

INCIDENT EXCEPTIONAL CLEARANCE DATE is the date on which an incident was cleared by exceptional means. If the INCIDENT EXCEPTIONAL CLEARANCE DATE does not equal Not Applicable (77777777), it must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

The FILE CREATION DATE is the date that the monthly submission file was created by the local agency. It must show that the file was created at least one day after the end of the IBR MONTH which is being submitted to DCJS. It must be a valid calendar date and correctly formatted as YYYYMMDD.

See Data Element #8 INCIDENT EXCEPTIONAL CLEARANCE DATE and Transmission Data Element TD#3 FILE CREATION DATE.

176 INCIDENT EXCEPTIONAL CLEARANCE DATE must be on or after INCIDENT OCCURRENCE DATE

The INCIDENT EXCEPTIONAL CLEARANCE DATE is the date on which an incident was cleared by exceptional means. If INCIDENT OCCURRENCE DATE does not equal Not Reported (88888888) or Unknown (99999999), the INCIDENT EXCEPTIONAL CLEARANCE DATE must be on or after the INCIDENT OCCURRENCE DATE.

The INCIDENT OCCURRENCE DATE is the year, month, and day when the incident occurred or the beginning of the time period in which it started (when appropriate). It may occasionally be entered as Not Reported or Unknown but whenever known it must be a valid calendar date and correctly formatted as YYYYMMDD.

See Data Elements #3 INCIDENT OCCURRENCE DATE and #8 INCIDENT EXCEPTIONAL CLEARANCE DATE.

178 LOCATION CODE OF INCIDENT must contain a valid City-Town-Village (CTV) code

Use the correct CTV Location code for the location where the incident occurred.

A list of valid CTV Location Codes is available on the DCJS website:

https://www.criminaljustice.ny.gov/crimnet/ojsa/crimereporting/ibr_refman/CTV%20Location%20Code%20List%20as%20of%2001-24-2020%20PDF.pdf

See Data Element #9 LOCATION CODE OF INCIDENT

180 STATION/DIVISION/PRECINCT IDENTIFIER must be left justified and contain no internal blanks

STATION/DIVISION/PRECINCT IDENTIFIER is an optional field. It is locally defined and may contain up to 6 alpha or numeric characters to specify the station, division, or precinct where the incident occurred. If fewer than 6 characters, it must be left justified. Otherwise, it must equal Not Applicable (777777).

See Data Elements #10 STATION/DIVISION/PRECINCT IDENTIFIER.

182 BIAS CRIME TYPE (first occurrence) must contain a valid bias motivation

A bias crime or hate crime incident is an offense or unlawful act, which, after investigation by law enforcement, is or appears to be motivated by offender bias or hatred.

Enter the most descriptive BIAS CRIME TYPE for the incident.

Racial Bias

- Anti-White (11)
- Anti-Black/African-American (12)
- Anti-American Indian/Alaskan Native (13)
- Anti-Asian (14)
- Anti-Multiple Races [Group] (15)
- Anti-Native Hawaiian/Pacific Islander (16)

Religious Bias

- Anti-Religious Practice [Generally] (20)
- Anti-Jewish (21)
- Anti-Roman Catholic (22)
- Anti-Protestant (23)
- Anti-Islamic/Muslim (24)
- Anti-Multiple Religions [Group] (26)
- Anti-Atheism/Agnosticism (27)
- Anti-Church of Jesus Christ (28)
- Anti-Other Religion (29)
- Anti-Jehovah's Witness (30)
- Anti-Eastern Orthodox [Russian/Greek/Other] (81)

Anti-Gender Non-Conforming (72)

If no bias was involved, enter No Bias/Not Applicable (77).

Not Reported by Agency (88) and Motivation of Perpetrator(s) Unknown (99) are valid choices however, these variables should not be used when other variables apply.

See Data Element #11 BIAS CRIME TYPE.

183 If the incident contains more than one BIAS CRIME TYPE, then enter only one bias motivation of each type

An incident may contain up to 5 distinct bias crime types. If the bias crime type does not equal *No Bias/Not Applicable* (77), it must not be repeated in successive occurrences of BIAS CRIME TYPE.

See Data Element #11 BIAS CRIME TYPE.

184 OFFENSE NUMBER must be in range of 01 to 75

The OFFENSE NUMBER must be greater than or = to 01 and less than or = to 75.

The local agency Records Management System should assign an OFFENSE NUMBER for each offense within an incident. The number is used in Data Element #39 VICTIM/OFFENSE LINK to link offenses to victims. It begins the Offense Segment for each incident, which contains Data Elements #12 through #21 for every offense involved. Each offense must have a number in the range of 01 to 75 that is internally unique within the incident.

EXAMPLE: If an incident involved both a homicide and a burglary, two Offense Segments would be required. The Offense Segment for the homicide would begin with Offense Number 01 entered in Data Element #12. The Offense Segment for the burglary would begin with 02 entered in Data Element #12, as it was the second offense reported for the incident.

See Data Element #12 OFFENSE NUMBER.

See Data Element #11-BIAS CRIME TYPE

186 INCIDENT/COMPLAINT OFFENSE must be a valid NYS Law

The first 21 characters of Data Element #13 INCIDENT/COMPLAINT OFFENSE must be an *exact match* with the DCJS Coded Law File. (The only exception is Justifiable Homicide, for which there is no criminal-law citation. Use the substitute "citation" of PL 35.30 for Justifiable Homicide.)

DCJS checks the validity of the NYS laws cited in INCIDENT/COMPLAINT OFFENSE fields in the submission file and converts the citations to an Offense (IBR Code) defined by the FBI for the National Incident-Based Reporting System (NIBRS).

Make sure the correct citation is entered and that you have the latest coded law file. Local agencies are responsible for maintaining their copy of the NYS Coded Law File.

It is available on the DCJS website at: <http://www.criminaljustice.ny.gov/crimnet/clf/rel-db/rel-db.htm>.

See Data Element #13 INCIDENT/COMPLAINT OFFENSE.

187 BIAS CRIME TYPE in the second, third, fourth, or fifth occurrence must contain a valid bias motivation

Data Element #11-BIAS CRIME TYPE in occurrences 2, 3, 4, and 5 cannot equal *Not Reported (88)*, or *Motivation of the Perpetrator(s) Unknown (99)*. Also, successive occurrences cannot be blank. If no Anti-bias type was involved in this occurrence, enter *No Bias/Not Applicable (77)*.

Valid Bias Motivations include:

190 INCIDENT LARCENY TYPE must contain a valid larceny type

If a larceny offense is being reported, the INCIDENT LARCENY TYPE field must contain a matching NYS NIBRS larceny type selection. Offense-specific coding is necessary to delineate the type of larceny, which cannot be determined using the NYS Penal Law.

Pocket-Picking (01)
Purse-Snatching (02)

If no larceny was involved, check that the correct offense was reported and enter Not Applicable (77). While Not Reported (88) and Unknown (99) are also valid, they should not be used when more descriptive variables are appropriate.

See Data Element #14 INCIDENT LARCENY TYPE.

192 INCIDENT LARCENY TYPE requires a larceny in INCIDENT/COMPLAINT OFFENSE

If the INCIDENT LARCENY TYPE field contains a valid larceny type selection, the corresponding INCIDENT/COMPLAINT OFFENSE field must contain a matching larceny offense citation: 23A, 23B, 23C, 23D, 23E, 23F, 23G, 23H, or 240.

If no larceny was involved, check that the correct offense was reported and change the larceny type to Not Applicable (77). While Not Reported (88) and Unknown (99) are also valid, they should not be used when more descriptive variables are appropriate.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #14 INCIDENT LARCENY TYPE.

194 INCIDENT/COMPLAINT OFFENSE is a larceny and requires a valid INCIDENT LARCENY TYPE

If the INCIDENT/COMPLAINT OFFENSE field = 23A, 23B, 23C, 23D, 23E, 23F, 23G, or 23H, then the corresponding INCIDENT LARCENY TYPE field must contain a matching valid larceny type. It must NOT = Not Applicable. While Not Reported (88) and Unknown (99) are valid, they should not be used when more descriptive variables are appropriate.

196 INCIDENT LOCATION TYPE must use a valid location type

INCIDENT LOCATION TYPE requires the selection of the most descriptive location type for the incident from the valid NYS NIBRS choices. Enter only one location for each offense. Select the most specific location code possible. While Not Reported and Unknown are also valid for location type, use of those choices should be avoided.

EXAMPLE: An assault started in a bar, continued into an adjoining parking lot, and ended in the street. Because the bar was the location where the offense originated and best describes the circumstances of the crime, "Bar" should be entered.

WEAPON/FORCE requires the selection of the most descriptive weapon or use of force for the offense from the valid NYS NIBRS choices. You may enter up to three choices (occurrences) for each offense reported. Select the most specific choices possible.

None/Not Applicable (99) may be used in the first occurrence only if the offense does not require a weapon or force. While Not Reported (88) and Unknown (99) may be entered for the first occurrence, they should not be used when more descriptive variables are appropriate. The correct weapon/force type should be determined and reported if possible.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #16 WEAPON/FORCE.

200 WEAPON/FORCE in the second or third occurrence must use a valid Weapon/Force

If the INCIDENT/COMPLAINT OFFENSE includes the use of a weapon or force, the corresponding WEAPON/FORCE field must contain at least one valid weapon or force.

Select the most descriptive weapon or use of force for the offense from the valid NYS NIBRS choices. You may enter up to three choices (occurrences) for each offense reported. Select the most specific choices possible. The second and third occurrences must be either an additional weapon or use of force, or None/Not Applicable. Not Reported (88) and Unknown (99) may not be used for second and third occurrences.

202 If the incident contains more than one WEAPON/FORCE, enter only one Weapon/Force of each type

WEAPON/FORCE collects information on *types of weapons*, not *counts of weapons*. If more than one weapon or use of force is entered, there must be no duplicate weapon/force types.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #16 WEAPON/FORCE.

204 If WEAPON/FORCE is None/Not Applicable, Not Reported, or Unknown, then successive occurrences must be None/Not Applicable

If None/Not Applicable (77), Not Reported (88), or Unknown (99) is entered, all succeeding Weapon/Force occurrences must be None/Not Applicable (77). The incident will be rejected if a weapon or force is entered second or third and Not Applicable is entered in an occurrence before it.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #16 WEAPON/FORCE.

206 WEAPON/FORCE (occurrence 1) cannot equal None/Not Applicable when INCIDENT/COMPLAINT OFFENSE is 09A, 09B, 09C, 13A, 13B, or 520

If the INCIDENT/COMPLAINT OFFENSE = 09A, 09B, 09C, 13A, 13B, or 520, then the corresponding WEAPON/FORCE (occurrence 1) must not equal *None/Not Applicable* (77).

NOTE: *IBR codes 11A, 11B, 11C, 11D, 100, 120, 210, 64A, or 64B may be reported with a WEAPON/FORCE type, however, there are circumstances where these offenses may be reported with a WEAPON/FORCE TYPE of None/Not Applicable.*

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #16 WEAPON/FORCE.

207 WEAPON/FORCE can only be entered when reporting a Crime Against Person (except Intimidation), Robbery, Extortion, or Weapon Law Violations

If the Incident does not contain at least one of the specified offenses, the WEAPON/FORCE must be reported as *None/Not Applicable*.

208 Simple Assault requires non-lethal weapon in WEAPON/FORCE

If the INCIDENT/COMPLAINT OFFENSE is 13B, the corresponding first occurrence of WEAPON/FORCE field must contain one of the following WEAPON/FORCE types:

Imitation Firearm (09)
Simulated Firearm *hand in pocket* (10)
Personal Weapons *hands, feet, teeth etc.* (14)
Other Weapon (19)

None/Not Applicable (77) may NOT be used in the first occurrence of WEAPON/FORCE. Not Reported (88) and Unknown (99) may be entered for the first occurrence, however, they should not be used when more descriptive Weapon/Force types are known. The correct weapon or force type should be determined and reported if possible.

Select the weapon or use of force for the offense from the valid NYS NIBRS choices. You may enter up to three choices (occurrences) for each offense reported. Select the most specific choices possible.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #16 WEAPON/FORCE.

209 Simple Assault requires non-lethal weapons in multiple occurrences of WEAPON/FORCE

If the INCIDENT/COMPLAINT OFFENSE is 13B, the corresponding 2nd and 3rd occurrence of WEAPON/FORCE field must contain one of the following WEAPON/FORCE types:

Imitation Firearm (09)
Personal Weapons *hands, feet, teeth etc.* (14)
Other Weapon (19)
None/Not Applicable (77)

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #16 WEAPON/FORCE.

210 NUMBER OF PREMISES ENTERED (BURGLARY) must be 00 – 99

Use the NUMBER OF PREMISES ENTERED (BURGLARY) field only when the offense is a burglary of a hotel or rental storage facility in which the Hotel Rule is applicable. The total number (in the range of 01 to 99) of individual rooms, units, suites, storage compartments, etc., involved must be reported. Enter 00 if Not Applicable, such as in the case of burglary of a single premises which is neither a hotel nor rental storage facility.

The Hotel Rule states: If a number of dwelling units under a single manager are burglarized and the offenses are most likely to be reported to the police by the manager rather than the individual tenants, the burglary should be scored as one offense. In NYS NIBRS, the Hotel Rule has been expanded to include rental storage facilities such as Mini-Storage and Self-Storage buildings. While the burglary of a multi-unit facility is one offense, NYS NIBRS wants the number of individual units entered illegally to be counted as well.

EXAMPLE: A hotel is burglarized, and 10 rooms were broken into during the incident. Enter 10 in NUMBER OF PREMISES ENTERED (BURGLARY).

See Data Element #17 NUMBER OF PREMISES ENTERED (BURGLARY).

- 216** **METHOD OF ENTRY (BURGLARY) must be Force, No Force, or Not Applicable**
- A forced entry occurs when force of any degree, a mechanical contrivance of any kind (including a passkey or skeleton key), or concealment is used to enter a building or other structure unlawfully.
- An unforced entry occurs when the unlawful entry was achieved without force through an unlocked door or window. If both forced and unforced entries were involved in the crime, the entry should be reported as having been accomplished through force.
- EXAMPLE 1: Investigation of a burglary complaint disclosed that the offenders entered the building through an unlocked street door and then forced a locked door to an office and stole a computer. Since one door was forced, Force (F) should be entered.
- EXAMPLE 2: Some teenagers entered an unlocked garage and stole a bicycle and some power tools. The entry should be No Force (N) since the garage door was unlocked and no force was used to enter.
- See Data Element #18 METHOD OF ENTRY (BURGLARY).
- 218** **METHOD OF ENTRY (BURGLARY) applies only to Burglary/Breaking and Entering**
- If the INCIDENT/COMPLAINT OFFENSE CODE does not = 220, the corresponding METHOD OF ENTRY (BURGLARY) must be Not Applicable (X).

- 220** **METHOD OF ENTRY (BURGLARY) is required for Burglary/Breaking and Entering**

233 CRIMINAL ACTIVITY/GANG INFORMATION TYPE associated with an offense cannot have duplicate values other than Not Applicable

The CRIMINAL ACTIVITY/GANG INFORMATION TYPE cannot be repeated in an Offense Segment contained in an incident must have a unique combination of Data Element #13-INCIDENT/COMPLAINT OFFENSE and Data Element #70-CRIMINAL ACTIVITY/GANG INFORMATION TYPE. The exception to this rule when the CRIMINAL ACTIVITY/GANG INFORMATION TYPE is equal to *Not Applicable* (X).

234 Negligent Manslaughter requires ASSAULT/HOMICIDE CIRCUMSTANCES (second occurrence) be Not Applicable

For each 09B reported, ASSAULT/HOMICIDE CIRCUMSTANCE (second occurrence) must = Not Applicable (77).

See Data Element #19 ASSAULT/HOMICIDE CIRCUMSTANCES.

235 If the CRIMINAL ACTIVITY/GANG INFORMATION TYPE (occurrence 1) is None/Unknown or Not Applicable, then occurrence 2 and occurrence 3 must be Not Applicable

If the first occurrence of CRIMINAL ACTIVITY/GANG INFORMATION TYPE is None/Unknown (N) or Not Applicable (X), then subsequent occurrences must be Not Applicable (X)

See Data Element #70-CRIMINAL ACTIVITY/GANG INFORMATION TYPE

236 Duplicate ASSAULT/HOMICIDE CIRCUMSTANCE are not allowed when INCIDENT/COMPLAINT OFFENSE CODE is 09A, 09B, or 13A

When incident compliant offense = 09A, 09B, or 13A, there cannot be any duplicate ASSAULT/HOMICIDE CIRCUMSTANCE types related to an Incident/Complaint Offense.

If the Incident/Complaint Offense is not 09A, 09B, or 13A, enter *Not Applicable* in both occurrences of ASSAULT/HOMICIDE CIRCUMSTANCE. This is the only duplicate choice allowed and may be used only when the offense is not Murder/Non-Negligent Manslaughter (09A), Negligent Manslaughter (09B), or Aggravated Assault (13A) entered in the INCIDENT/COMPLAINT OFFENSE field.

See Data Element #19 ASSAULT/HOMICIDE CIRCUMSTANCE.

237 CRIMINAL ACTIVITY/GANG INFORMATION TYPE (occurrence 1) cannot be "Not Applicable" for specified offense. See NYS NIBRS Error Messages and Explanations

Agencies must report a CRIMINAL ACTIVITY TYPE (occurrence 1) other than Not Applicable in incidents involving the following offenses:

- 250 = Counterfeiting/Forgery
- 280 = Stolen Property Offense
- 35A = Drug/Narcotic Violation
- 35B = Drug Equipment Violation
- 39C = Gambling Equipment Violation
- 370 = Pornography/Obscene Material
- 520 = Weapon Law Violation
- 720 = Animal Cruelty

Agencies must report a GANG INFORMATION TYPE (occurrence 1) other than Not Applicable to describe the type, or lack of presence, of an offender's gang activity for incidents involving the following offenses:

- 09A = Murder and Non-Negligent Manslaughter
- 09B = Negligent Manslaughter
- 100 = Kidnapping/Abduction
- 120 = Robbery
- 11A = Rape
- 11B = Sodomy
- 11C = Sexual Assault with an Object
- 11D = Fondling
- 13A = Aggravated Assault
- 13B = Simple Assault
- 13C = Intimidation

See Data Elements #70-CRIMINAL ACTIVITY/GANG INFORMATION TYPE

238 If ASSAULT/HOMICIDE CIRCUMSTANCE (occurrence 1) is Unknown Circumstances, then ASSAULT/HOMICIDE CIRCUMSTANCE (occurrence 2) must be Not Applicable

If *Unknown Circumstances* (21) is entered in the first occurrence, the only valid choice for the second occurrence is *Not Applicable* (77).

239 CRIMINAL ACTIVITY TYPE other than Not Applicable may only be reported for specified offenses. See NYS NIBRS Error Messages and Explanations

The following CRIMINAL ACTIVITY TYPE:

B = Buying/Receiving
C = Cultivating/Manufacturing/Publishing
D = Distributing/Selling
E = Exploiting Children
O = Operating/Promoting/Assisting,
P = Possessing/Concealing
T = Transporting/Transmitting/Importing,
U = Using/Consuming

may only be reported if offense is specified below:

250 = Counterfeiting/Forgery
280 = Stolen Property Offense
35A = Drug/Narcotic Violation
35B = Drug Equipment Violation
370 = Pornography/Obscene Material
39C = Gambling Equipment Violation
520 = Weapon Law Violation

See Data Element #70-CRIMINAL ACTIVITY/GANG INFORMATION TYPE

240 If ASSAULT/HOMICIDE CIRCUMSTANCE (occurrence 1) is Not Applicable, then ASSAULT/HOMICIDE CIRCUMSTANCE (occurrence 2) must be Not Applicable

If the Incident/Complaint offense is not 09A, 09B, or 13A, the ASSAULT/HOMICIDE CIRCUMSTANCE must be Not Applicable (77). If ASSAULT/HOMICIDE CIRCUMSTANCE (occurrence 1) is *Not Applicable* (77) the only valid choice for Assault/Homicide Circumstance (occurrence 2) is *Not Applicable* (77).

See Data Element #19 ASSAULT/HOMICIDE CIRCUMSTANCE.

241 GANG INFORMATION TYPE (occurrence 1) other than Not Applicable may only be reported for specified offense. See NYS NIBRS Error Messages and Explanations

If INCIDENT COMPLAINT OFFENSE is one of the following offenses:

09A = Murder and Non-Negligent Manslaughter
09B = Negligent Manslaughter
100 = Kidnapping/Abduction
120 = Robbery
11A = Rape
11B = Sodomy
11C = Sexual Assault with an Object
11D = Fondling
13A = Aggravated Assault
13B = Simple Assault
13C = Intimidation

then the GANG INFORMATION TYPE (occurrence 1) must be Juvenile Gang less than 18 years of age (J), Other Gang 18 years of age or older (G), or None/Unknown (N).

See Data Element #70 CRIMINAL ACTIVITY/GANG INFORMATION TYPE.

242 For a Justifiable Homicide, enter a specific JUSTIFIABLE HOMICIDE CIRCUMSTANCE choice

If a Justifiable Homicide occurs in the context of a criminal incident, it is to be reported as an additional offense in the INCIDENT/COMPLAINT OFFENSE field. Since there is no Penal Law citation for Justifiable Homicide, the substitute "citation" of PL 35.30 is used. DCJS converts the citation to the Offense IBR Code "09C Justifiable Homicide" for reporting to the FBI.

Enter only one circumstance per Justifiable Homicide offense. *Not Applicable* may not be used.

EXAMPLE: In resisting arrest, a fugitive pulled a gun and fired two times in the direction of two police officers who were attempting to take him into custody. Neither officer was hit, but both drew their weapons and returned fire, killing the fugitive. The possible entries are: *Criminal Attacked Police Officer and That Officer Killed Criminal*; *Criminal Attacked Police Officer and Criminal Killed by Another Police Officer*; and *Criminal Resisted Arrest (Killed by Police Officer)*. As only one code can be entered, the most descriptive code (as determined by the reporting agency) should be used. In this case, the reporting agency entered *Criminal Attacked Police Officer and That Officer Killed Criminal*.

See Data Element #20 JUSTIFIABLE HOMICIDE CIRCUMSTANCE.

243 CRIMINAL ACTIVITY TYPE can only be Simple/Gross Neglect, Organized Abuse, Intentional Abuse and Torture, or Animal Sexual Abuse when offense is Animal Cruelty

If the CRIMINAL ACTIVITY TYPE is:

A = Simple/Gross Neglect

F = Organized Abuse (dog fighting/cock fighting)

I = Intentional Abuse and Torture (tormenting, mutilating, maiming, poisoning, or abandonment)

S = Animal Sexual Abuse (Bestiality)

the related offense must be 720 = Animal Cruelty.

See Data Element #70 CRIMINAL ACTIVITY/GANG INFORMATION TYPE.

244 If the incident does not contain a Justifiable Homicide, enter Not Applicable in the JUSTIFIABLE HOMICIDE CIRCUMSTANCE

If the INCIDENT/COMPLAINT OFFENSE does not = 09C, the corresponding JUSTIFIABLE HOMICIDE CIRCUMSTANCE field must be *Not Applicable (77)*.

See Data Element #20 JUSTIFIABLE HOMICIDE CIRCUMSTANCE.

245 CRIMINAL ACTIVITY/GANG INFORMATION TYPE (occurrence 1) must be Not Applicable for unspecified offense

If Data Element #13-INCIDENT/COMPLAINT OFFENSE CODE is not one of the following offenses, then the CRIMINAL ACTIVITY/GANG INFORMATION TYPE (occurrence 1) must = Not Applicable (X):

250 = Counterfeiting/Forgery
280 = Stolen Property Offense
35A = Drug/Narcotic Violation
35B = Drug Equipment Violation
39C = Gambling Equipment Violation
370 = Pornography/Obscene Material
520 = Weapon Law Violation
720 = Animal Cruelty
09A = Murder and Non-Negligent Manslaughter
09B = Negligent Manslaughter
100 = Kidnapping/Abduction
120 = Robbery
11A = Rape
11B = Sodomy
11C = Sexual Assault with an Object
11D = Fondling
13A = Aggravated Assault
13B = Simple Assault
13C = Intimidation

See Data Element #70 CRIMINAL ACTIVITY/GANG INFORMATION TYPE

246 Use a valid OFFENDER USED COMPUTER/HANDHELD DEVICE choice

The OFFENDER USED COMPUTER/HANDHELD DEVICE field requires the selection of either *Computer Not Used to Commit Offense* (0) or *Offender Used Computer to Commit Offense* (1) for the corresponding INCIDENT/COMPLAINT OFFENSE CODE. Enter only one of them for each offense; the *Offender Used Computer to Commit Offense* (1) choice would indicate that a computer was a tool in commission of the crime. While *Not Reported* (8) is also valid for this field, use of that choice should be avoided if possible. The correct choice should be determined and reported.

EXAMPLE: A private residence was burglarized, and a personal computer was stolen along with other items. The incident should be reported as *Computer Not Used to Commit Offense*. Although the computer was one of the property types stolen, it was not used to commit the crime.

See Data Element #21 OFFENDER USED COMPUTER.

248 A specific PROPERTY INVOLVEMENT is required for every property offense

If INCIDENT/COMPLAINT OFFENSE = 23A, 23B, 23C, 23D, 23E, 23F, 23G, 23H, 240, 26A, 26B, 26C, 26D, 26E, 26F, 26G, 120, 200, 210, 220, 250, 270, 280, 290, or 510, then a separate property segment must be submitted for every property crime reported. For each segment, enter only one method of loss in the PROPERTY INVOLVEMENT Types from the list below:

- None/Not Applicable (01)
- Burned (02) [includes damage caused in fighting the fire]
- Counterfeited/Forged (03)
- Destroyed/Damaged/Vandalized (04)
- Recovered (05) [law enforcement impounded property which was previously reported stolen]
- Seized (06) [law enforcement impounded property which was not previously reported stolen]
- Stolen/etc. (07) [includes bribed, defrauded, embezzled, extorted, ransomed, robbed, etc.]
- Not Reported (88)
- Unknown (99)

None/Not Applicable (01) may not be used when there is a loss of property. While *Not Reported* (88) and *Unknown* (99) are valid choices, their use should be avoided when more descriptive options are available.

See Data Element #22 PROPERTY INVOLVEMENT.

250 PROPERTY INVOLVEMENT of Burned, Counterfeited, Destroyed, Recovered, Seized, or Stolen requires a PROPERTY TYPE other than None in PROPERTY TYPE (occurrence 1)

If PROPERTY INVOLVEMENT = *Burned* (02), *Counterfeited/Forged* (03), *Destroyed/Damaged/Vandalized* (04), *Recovered* (05), *Seized* (06), or *Stolen* (07), then a PROPERTY TYPE other than *Not Applicable* (77) must be entered in the PROPERTY TYPE (occurrence 1) field.

While *Not Reported* (88) and *Unknown* (99) are valid PROPERTY INVOLVEMENT and PROPERTY TYPE choices, their use should be avoided. The actual involvement and type should be determined and reported if possible.

Enter up to 10 PROPERTY TYPE descriptions for each Property Segment. If more than 10, enter the 9 most valuable specific types of property and use *Other Property* in the 10th. Property Type is a classification of property and multiple property items may be collapsed under a Property Type Category.

If property was burned and it is temporarily impossible to determine the property lost, enter *Pending Inventory* (50). An updated Property Segment with entries describing the types of burned property should be submitted when the results of the inventory are subsequently learned.

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

252 Use a valid PROPERTY TYPE in the first occurrence

The first occurrence of PROPERTY TYPE must contain one of the 65-plus valid choices for the type of property that was *burned, stolen, recovered*, etc., in the crime. Enter up to 10 PROPERTY TYPE descriptions for each Property Segment. If more than 10, enter the 9 most valuable specific types of property and use Other Property in the 10th.

Use of *Not Reported* (88) and *Unknown* (99) should be avoided. The most descriptive property type should be determined and reported if possible.

Not Applicable (77) may be used only in PROPERTY TYPE (occurrence 1) when no property is involved with the offense.

An attempted Burglary with no property stolen requires a property type of *Not Applicable* (77).

If property was burned and it is temporarily impossible to determine the property lost, enter *Pending Inventory* (50). An updated Property Segment with entries describing the types of burned property should be submitted later when the results of the inventory are subsequently learned.

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

254 Second and following occurrences of PROPERTY TYPE must contain valid choices

For all occurrences of PROPERTY INVOLVEMENT, use valid NYS NIBRS property descriptions in the corresponding occurrences of the PROPERTY TYPE field. The most descriptive property types should be determined and reported if possible.

Not Applicable (77) may be used only following the last descriptive choice, and once used, all following occurrences must also be *Not Applicable* (77).

Not Reported (88) and *Unknown* (99) are not valid choices in any occurrence beyond the first.

No blanks may be left in occurrences followed by later descriptive choices.

Enter up to 10 PROPERTY TYPE descriptions for each Property Segment. If more than 10, enter the 9 most valuable specific types of property and use *Other Property* (49) in the 10th.

If property was burned and it is temporarily impossible to determine the property lost, enter *Pending Inventory* (50). An updated Property Segment with entries describing the types of burned property should be submitted later when the results of the inventory are subsequently learned.

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

256 PROPERTY TYPE cannot have duplicate values within the same property segment

For each PROPERTY SEGMENT, each PROPERTY TYPE, other than *Not Applicable (77)*, cannot be repeated within that property segment.

A property type is a category of property for which there may be several distinct items which collapse under this distinct Property Type.

Multiple occurrences of PROPERTY TYPE are used to capture *types* of property, not amounts, or counts of property.

Each PROPERTY TYPE occurrence related to a PROPERTY INVOLVEMENT (stolen, recovered, seized, burned, destroyed/damaged/vandalized, counterfeited/forged, etc.). A distinct PROPERTY TYPE can be repeated in separate property segments that have distinct PROPERTY INVOLVEMENTS.

For example, a PROPERTY TYPE can be reported in a PROPERTY SEGMENT where the PROPERTY INVOLVEMENT is Stolen and ALSO reported in an additional PROPERTY SEGMENT where the PROPERTY INVOLVEMENT is Recovered. A PROPERTY SEGMENT reports ONLY one PROPERTY INVOLVEMENT.

Not Applicable (77) may be used only following the last descriptive choice entered, and all following occurrences must also be Not Applicable. It is the only choice that can be used more than once.

Not Reported (88) and *Unknown (99)* can ONLY be reported in PROPERTY TYPE (occurrence 1).

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

258 PROPERTY INVOLVEMENT of None/Not Applicable requires Not Applicable in all occurrences of PROPERTY TYPE

If the PROPERTY INVOLVEMENT choice entered is *None/Not Applicable (01)* all occurrences of the PROPERTY TYPE field must equal *Not Applicable (77)*.

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

260 PROPERTY INVOLVEMENT of Not Reported requires Not Reported in first occurrence of PROPERTY TYPE

If the PROPERTY INVOLVEMENT entered is *Not Reported (88)*, then PROPERTY TYPE (occurrence 1) must equal *Not Reported (88)*.

While *Not Reported (88)* is an acceptable choice, use of it should be avoided if possible. The most descriptive property involvement and property type should be determined and reported.

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

262 PROPERTY INVOLVEMENT of Unknown requires Unknown in first occurrence of PROPERTY TYPE

For a property-crime offense, the corresponding PROPERTY INVOLVEMENT field must contain one method of loss from the NYS NIBRS choices. If the PROPERTY INVOLVEMENT choice entered is *Unknown* (99) then PROPERTY TYPE (occurrence 1) must equal *Unknown* (99).

While *Unknown* (99) is an acceptable choice, use of it should be avoided if possible. The most descriptive property involvement and property type should be determined and reported.

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

264 In multiple occurrences of PROPERTY TYPE, once Not Applicable, Not Reported, or Unknown is entered, all successive occurrences must be Not Applicable

If any occurrence of the PROPERTY TYPE = *Not Applicable* (77), *Not Reported* (88) or *Unknown* (99), then all successive occurrences of PROPERTY TYPE must = *Not Applicable* (77).

See Data Elements #22 PROPERTY INVOLVEMENT and #23 PROPERTY TYPE.

266 PROPERTY TYPE of Pending Inventory requires that all successive occurrences be Not Applicable

If it is temporarily impossible to determine the property lost, due to its having been burned or for any other reason, enter *Pending Inventory* (50). If some property is known and other property is not, enter the known property types lost first and *Pending Inventory* (50) last. All successive PROPERTY TYPE entries entered after Pending Inventory must = *Not Applicable* (77).

An updated Property Segment with entries describing the types of burned property should be submitted later when the results of the inventory are subsequently learned.

See document Data Element #23 PROPERTY TYPE.

268 PROPERTY TYPE of Pending Inventory requires a PROPERTY VALUE of Unknown

If *Pending Inventory* (50) is entered in an occurrence of PROPERTY TYPE, the corresponding occurrence of PROPERTY VALUE must be *Unknown* (999999999).

A PROPERTY TYPE of *Pending Inventory* is considered temporary and anticipates that, after inventory, the property that was destroyed, burned, or stolen, etc., will be listed in an update of the incident. Once the type of property has been established, change the PROPERTY TYPE field to reflect the correct type of description and enter the actual dollar value in the PROPERTY VALUE field. Enter total dollar value loss in whole dollars for all victims in the incident for each of the up to 10 types listed in PROPERTY TYPES.

If the incident did not involve 10 property types, fill the remaining occurrences of Property Value with *Not Applicable* (77).

If the incident did not have any property involvement, the first occurrence of both PROPERTY TYPE and PROPERTY VALUE must be *Not Applicable*.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

270 PROPERTY TYPE of Not Applicable in the first occurrence requires a PROPERTY VALUE of Not Applicable in all occurrences

If PROPERTY TYPE (occurrence 1) is *Not Applicable (77)*, all occurrences of PROPERTY VALUE must be *Not Applicable (77777777)*. An attempted Burglary with no property stolen requires a property type of *Not Applicable (77)*.

If the incident did not involve 10 property types, fill the remaining occurrences of Property Value with *Not Applicable (77777777)*.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

274 PROPERTY INVOLVEMENT of Recovered requires a valid PROPERTY RECOVERY DATE, formatted as YYYYMMDD

When the method of loss entered in the PROPERTY INVOLVEMENT field is *Recovered (05)*, each occurrence of the PROPERTY TYPE field requires a corresponding occurrence of the PROPERTY RECOVERY DATE field. *Not Applicable (77777777)* may not be used. The date entered must be a valid calendar date formatted as YYYYMMDD.

Up to 10 dates of recovery can be entered to match each of the up to 10 property types associated with the Recovered Property Segment for the incident. If there is more than one date of recovery for the same PROPERTY TYPE, enter the earliest date. If the PROPERTY RECOVERY DATE is unknown, enter the date of the report.

EXAMPLE: On July 8, 2037, a residence was burglarized. Two mountain bicycles were stolen. The first bicycle was recovered on July 14, 2037, and the second on July 24. The first occurrence of PROPERTY TYPE should be *Bicycles (32)* and the first occurrence of PROPERTY RECOVERY DATE should be *20370714* since that is the earliest date of recovery for this property type. All remaining occurrences of PROPERTY RECOVERY DATE should be reported as *Not Applicable (77777777)*.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #25 PROPERTY RECOVERY DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

276 PROPERTY TYPE of Not Applicable in the first occurrence requires that NUMBER OF MOTOR VEHICLES STOLEN also be Not Applicable

If PROPERTY TYPE (occurrence 1) is reported as *Not Applicable (77)*, the NUMBER OF MOTOR VEHICLES STOLEN field also must be *Not Applicable (777)*.

If the property stolen did not include any motor vehicles, enter *Not Applicable* in the NUMBER OF MOTOR VEHICLES STOLEN field. While *Unknown (999)* is an acceptable choice, use of it should be avoided. The correct number of vehicles or the best approximation should be determined if possible.

Since NCIC requires separate entry of each motor vehicle stolen, most agencies create a separate incident report for each stolen motor vehicle in order to facilitate subsequent investigation and data entry, should the vehicle be recovered. Therefore, it is most likely that the number of stolen motor vehicles in any incident will always be one for agencies using this reporting practice.

EXAMPLE: A car-carrier truck loaded with 5 new vehicles awaiting delivery is stolen. The NUMBER OF MOTOR VEHICLES STOLEN in this incident would be *006* (the truck and five new cars) if the one vehicle per incident reporting practice was not used by the agency.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #26 NUMBER OF MOTOR VEHICLES STOLEN.

278 PROPERTY TYPE of Not Applicable in the first occurrence requires that the NUMBER OF MOTOR VEHICLES RECOVERED also be Not Applicable

If PROPERTY TYPE (occurrence 1) is reported as *Not Applicable (77)*, the NUMBER OF MOTOR VEHICLES RECOVERED field also must be *Not Applicable (777)*.

If the property recovered did not include any motor vehicles, enter *Not Applicable (777)* in the NUMBER OF MOTOR VEHICLES RECOVERED field. While *Unknown (999)* is an acceptable choice, use of it should be avoided. The correct number of vehicles or the best approximation should be determined if possible.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #27 NUMBER OF MOTOR VEHICLES RECOVERED.

NYS NIBRS Error Messages and Explanations

280 If PROPERTY TYPE (occurrence 1) is Not Applicable, then SOURCE OF DRUG DATA must be Not Applicable

If PROPERTY TYPE (occurrence 1) is reported as *Not Applicable* (77), the SOURCE OF DRUG DATA field also must be *Not Applicable* (7).

SOURCE OF DRUG DATA describes whether the information to follow in the DRUG TYPE, DRUG QUANTITY, and DRUG MEASUREMENT UNIT fields are based on an estimate or on the results of laboratory analysis.

SOURCE OF DRUG DATA is used only to identify the source of data on Drugs/Narcotics seized in a drug case where PROPERTY INVOLVEMENT is *Seized* (06); otherwise, SOURCE OF DRUG DATA should be reported as *Not Applicable* (7). While *Unknown* (9) is an acceptable choice, use of it should be avoided. The correct source of drug data should be determined and reported.

Once SOURCE OF DRUG DATA is determined to be *Not Applicable* (7), all the remaining fields concerned with seizure of drugs also become *Not Applicable* (7).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #28 SOURCE OF DRUG DATA.

282 If PROPERTY TYPE (occurrence 1) is Not Applicable, then DRUG TYPE must be None/Not Applicable

If PROPERTY TYPE (occurrence 1) is reported as *Not Applicable* (77), all occurrences of the DRUG TYPE field must be *None/Not Applicable* (00).

The DRUG TYPE field is used only to identify the type of Drugs/Narcotics seized where PROPERTY INVOLVEMENT is *Seized* (06); otherwise, DRUG TYPE should be reported as *None/Not Applicable* (00). While *Unknown* (99) is an acceptable choice, use of it should be avoided. The correct type of drug should be determined if possible and reported.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #29 DRUG TYPE.

284 PROPERTY TYPE of Not Applicable in the first occurrence requires that DRUG QUANTITY be Not Applicable in all occurrences

If PROPERTY TYPE (occurrence 1) is reported as *Not Applicable* (77), all occurrences of the DRUG QUANTITY field must be *None/Not Applicable* (77777777). *Not Applicable* (77) in the PROPERTY TYPE field indicates that there is no property -- including drugs -- involved in this incident. It follows that where no property is involved, there will be no entry for property count, quantity, or other measurement.

See Data Elements #23 PROPERTY TYPE and #30 DRUG QUANTITY.

286 PROPERTY TYPE of Not Applicable in the first occurrence requires that DRUG MEASUREMENT UNIT be Not Applicable in all occurrences

If PROPERTY TYPE (occurrence 1) is reported as *Not Applicable* (77), then all occurrences of the DRUG MEASUREMENT UNIT field also must be *Not Applicable* (NA).

288 PROPERTY TYPE of Not Reported or Unknown in the first occurrence requires that PROPERTY VALUE be Unknown in all occurrences

If PROPERTY TYPE (occurrence 1) is *Not Reported* (88) or *Unknown* (99), then the first occurrence of PROPERTY VALUE must be *Unknown* (999999999). All following occurrences of both these fields must then be *Not Applicable* (777777777).

Use of *Unknown* (99) and *Not Reported* (88) for property type choices should be avoided. If any property was lost, the actual involvement, type, and value should be determined and reported if possible. An attempted Burglary with no property stolen requires a property type of *Not Applicable* (77).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #24 PROPERTY VALUE.

290 PROPERTY TYPE of Not Reported or Unknown in the first occurrence requires that NUMBER OF MOTOR VEHICLES STOLEN be Not Applicable

If PROPERTY TYPE (occurrence 1) is *Not Reported* (88) or *Unknown* (99), then the NUMBER OF MOTOR VEHICLES STOLEN field must be *Not Applicable* (777). All following occurrences of PROPERTY TYPE must then be *Not Applicable* (77). Use of *Unknown* (99) and *Not Reported* (88) should be avoided. If any property was lost, the actual involvement, type, value, and number of vehicles (if any) should be determined and reported if possible.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #26 NUMBER OF MOTOR VEHICLES STOLEN.

292 PROPERTY TYPE of Not Reported or Unknown in the first occurrence requires that NUMBER OF MOTOR VEHICLES RECOVERED be Not Applicable

If PROPERTY TYPE (occurrence 1) is *Not Reported* (88) or *Unknown* (99), the NUMBER OF MOTOR VEHICLES RECOVERED field must be *Not Applicable* (777). All following occurrences of PROPERTY TYPE must then be *Not Applicable* (77). Use of *Unknown* (99) and *Not Reported* (88) should be avoided. If any property was recovered, the actual involvement, type, value, and number of vehicles (if any) should be determined and reported if possible.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #27 NUMBER OF MOTOR VEHICLES RECOVERED.

294 PROPERTY TYPE of Not Reported or Unknown in the first occurrence requires that SOURCE OF DRUG DATA be Not Applicable

If PROPERTY TYPE (occurrence 1) is *Not Reported* (88) or *Unknown* (99), the SOURCE OF DRUG DATA field must be *Not Applicable* (7). All following occurrences of PROPERTY TYPE must then be *Not Applicable* (77).

Use of *Not Reported* (88) and *Unknown* (99) for Property Type should be avoided.

SOURCE OF DRUG DATA is used only to identify the source of data on Drugs/Narcotics in a drug case where PROPERTY INVOLVEMENT is *Seized* (06); otherwise, it should be reported as *Not Applicable* (7).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #28 SOURCE OF DRUG DATA.

Use of *Not Reported* (88) and *Unknown* (99) for PROPERTY TYPE should be avoided.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #29 DRUG TYPE.

298 PROPERTY TYPE of Not Reported in the first occurrence requires that DRUG QUANTITY be Not Applicable in the first occurrence

If PROPERTY TYPE (occurrence 1) is *Not Reported* (88), the DRUG QUANTITY field must be *Not Applicable* (7777777777). All following occurrences of PROPERTY TYPE must then be *Not Applicable* (77).

While *Not Reported* (88) is an acceptable choice for PROPERTY TYPE its use should be avoided.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, #29 DRUG TYPE, and #30 DRUG QUANTITY.

300 PROPERTY TYPE of Unknown in the first occurrence requires that DRUG QUANTITY be Not Applicable in the first occurrence

If PROPERTY TYPE (occurrence 1) is *Unknown* (99), then DRUG QUANTITY (occurrence 1) must be *Not Applicable* (7777777777).

Use of *Not Reported* (88) and *Unknown* (99) should be avoided.

302 PROPERTY TYPE of Not Reported or Unknown in the first occurrence requires that DRUG MEASUREMENT UNIT be Not Applicable in the first occurrence

If PROPERTY TYPE (occurrence 1) is *Not Reported* (88) or *Unknown* (99), the DRUG MEASUREMENT UNIT (occurrence 1) field must be *Not Applicable* (NA).

Use of *Not Reported* (88) and *Unknown* (99) should be avoided.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, #29 DRUG TYPE, #30 DRUG QUANTITY, and #31 DRUG MEASUREMENT UNIT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

304 PROPERTY TYPE of Not Applicable in any occurrence requires that PROPERTY VALUE be Not Applicable in the same occurrence

If any occurrence (1, 2, 3, 4, 5, 6, 7, 8, 9, 10) of PROPERTY TYPE is *Not Applicable (77)*, the same occurrence of PROPERTY VALUE also must be *Not Applicable (77777777)*. After *Not Applicable (77)* is first used in PROPERTY TYPE, all subsequent occurrences of PROPERTY TYPE and PROPERTY VALUE must then be *Not Applicable (77)*.

If the incident involved fewer than 10 property types, fill the remaining occurrences of PROPERTY VALUE with *Not Applicable (77777777)*.

An attempted burglary with no property stolen requires a PROPERTY TYPE of *Not Applicable (77)* in the first occurrence.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

306 A known Non-Drug PROPERTY TYPE requires a PROPERTY VALUE

Each occurrence (1, 2, 3, 4, 5, 6, 7, 8, 9, 10) of PROPERTY TYPE must have a corresponding occurrence of PROPERTY VALUE with either a known dollar amount, or *Unknown (999999999)*. The exception to this statement is when PROPERTY TYPE is *Drugs/Narcotics (26)* or is *Not Applicable (77)*. (In the case of *Drugs/Narcotics (26)* in PROPERTY TYPE, a dollar amount must be entered in PROPERTY VALUE; *Unknown (999999999)* is not allowed. In the case of PROPERTY TYPE *Not Applicable (77)*, PROPERTY VALUE is also *Not Applicable (77777777)*).

While *Unknown (999999999)* is valid for PROPERTY VALUE, its use should be avoided. The correct value or the best approximation should be determined if possible and reported.

A separate Property Segment must be submitted for each method of loss described under PROPERTY INVOLVEMENT. For example, an incident containing larceny and arson would have two property segments [*Burned (02)* and *Stolen/etc. (07)*]. Each segment may contain up to ten occurrences of property types in the PROPERTY TYPE field. Each occurrence of a different property type should have a corresponding PROPERTY VALUE. The amount entered in each occurrence should be the total dollar value for all victims of that particular type of property loss within the incident. The grand total of all property type losses in all property segments should add up to the total property losses for all victims of the incident.

If the incident did not involve 10 property types, fill the remaining occurrences of PROPERTY TYPE with *Not Applicable (77)*. If the incident did not include any property involvement, the first occurrence of both PROPERTY TYPE and PROPERTY VALUE must be entered as *Not Applicable (77 and 77777777)*.

When an occurrence of PROPERTY TYPE lists *Drugs/Narcotics (26)* as part of other types of property involvement (e.g., they were stolen through burglary, robbery, theft, etc., or destroyed by arson) only the PROPERTY VALUE is to be completed. The SOURCE OF DRUG DATA, DRUG QUANTITY, and DRUG MEASUREMENT UNIT fields are all to be entered as *Not Applicable (7, 00, 77777777 777, NA)* and the DRUG TYPE should be entered as *None/Not Applicable (00)*.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

308 A PROPERTY INVOLVEMENT other than Seized, with a PROPERTY TYPE of Drugs/Narcotics, requires a PROPERTY VALUE other than Not Applicable

In an incident including a PROPERTY TYPE of *Drugs/Narcotics* (26) with a PROPERTY INVOLVEMENT choice of other than *Seized* (06), the corresponding occurrence of PROPERTY VALUE must be a known dollar amount, or *Unknown* (999999999).

If the incident did not include any property involvement, then the first occurrence of both PROPERTY TYPE and PROPERTY VALUE must be coded as *Not Applicable* (*Property Type = 77 and Property Value = 777777777*).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #24 PROPERTY VALUE.

310 PROPERTY VALUE must be a valid 9-digit numeric with a zero left-fill

When an actual dollar value is entered in PROPERTY VALUE, the amount must be entered in whole dollars. The entry must be right justified with zero fill on the left if the value uses fewer than 9 positions. If the value of property is \$1,855, the entry would be *000001855*.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #24 PROPERTY VALUE.

311 A PROPERTY VALUE of Zero is permitted only with PROPERTY TYPE of Credit/Debit Card, Non-Negotiable Instruments, Documents (Personal or Business), Other Property, Identity Documents, or Identity (Intangible)

If any occurrence of PROPERTY VALUE is reported as zero (000000000), the corresponding PROPERTY TYPE must be *Credit/Debit Cards* (02), *Non-Negotiable Instruments* (04), *Documents [Personal/Business]* (05), *Other Property* (49), *Identity Documents* (65), or *Identity [Intangible]* (66).

Other Property (49) is the only PROPERTY TYPE that may have either a PROPERTY VALUE of zero or a defined value.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

312 A PROPERTY TYPE of Credit/Debit Card, Non-Negotiable Instruments, Documents (Personal or Business), Identity Documents, or Identity (Intangible) must have a PROPERTY VALUE of Zero

If any PROPERTY TYPE is reported as *Credit/Debit Card* (02), *Non-Negotiable Instruments* (04), *Documents [Personal/Business]* (05), *Identity Documents* (65), or *Identity [Intangible]* (66), the PROPERTY VALUE must be reported as zero (000000000). These types of property, no matter how important to the owner, are deemed to have no intrinsic value in commercial terms.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

NYS NIBRS Error Messages and Explanations

316 A valid PROPERTY VALUE requires a valid PROPERTY TYPE

If an occurrence of PROPERTY VALUE contains any choice other than *Not Applicable (77777777)*, the corresponding occurrence of PROPERTY TYPE must NOT = *Not Applicable (77)*.

A dollar amount in an occurrence of PROPERTY VALUE must correspond with a type of property specified in PROPERTY TYPE. *Not Applicable (77777777)* in an occurrence of PROPERTY VALUE must correspond with a *Not Applicable (77)* in PROPERTY TYPE.

While *Unknown (99999999 Property Value and 88 Property Type)* and is a valid choice for both fields, use of it should be avoided. *Not Reported* is Not a valid PROPERTY VALUE. The correct value and property type, or the best possible approximations, should be determined and entered.

See Data Elements #23 PROPERTY TYPE and #24 PROPERTY VALUE.

318 PROPERTY RECOVERY DATE must be a valid date or Not Applicable

A PROPERTY RECOVERY DATE is required for each PROPERTY TYPE whose status under PROPERTY INVOLVEMENT is *Recovered (05)*.

Up to ten dates of recovery can be entered to match each of the up-to-ten property types associated with the *Recovered* PROPERTY INVOLVEMENT.

If there is more than one date of recovery for the same PROPERTY TYPE, enter the earliest date. If the PROPERTY RECOVERY DATE is unknown, enter the date of the report.

Date must be formatted as YYYYMMDD as shown below. If no property has been recovered, enter *Not Applicable (77777777)*.

YYYY	Four-digit year, e.g.	2029
MM	Two-digit month, e.g.	09
DD	Two-digit day, e.g.	30

This PROPERTY RECOVERY DATE of September 30, 2029 is entered as *20290930*.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #25 PROPERTY RECOVERY DATE.

320 PROPERTY RECOVERY DATE must be on or later than the IBR STARTUP DATE for agency, or Not Applicable

A PROPERTY RECOVERY DATE is required for each PROPERTY TYPE whose status under PROPERTY INVOLVEMENT is *Recovered (05)*. Up to ten dates of recovery can be entered to match each of the up-to-ten property types associated with the *Recovered (05)* Property Segment for the incident.

The IBR STARTUP DATE is the official date agreed upon with DCJS for the agency to start submitting incident-based crime data as its routine monthly crime report. Crime statistics prior to that date must have been submitted through UCR Summary reporting. The startup date is always a valid calendar date, usually the first day of a month, and is formatted as YYYYMMDD.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #25 PROPERTY RECOVERY DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

322 PROPERTY RECOVERY DATE must not be later than the FILE CREATION DATE

A PROPERTY RECOVERY DATE is required for each PROPERTY TYPE whose status under PROPERTY INVOLVEMENT is *Recovered* (05). Up to ten Property Recovery Dates can be entered to match the up-to-ten property types associated with the *Recovered* (05) Property Segment for the incident.

FILE CREATION DATE is the date that the NYS NIBRS monthly file was created by your agency for submission to DCJS. The FILE CREATION DATE must be at least one day after the end of the month for which crime data are being submitted to DCJS. It must be a valid calendar date and correctly formatted as YYYYMMDD.

If there is more than one date of recovery for the same PROPERTY TYPE, enter the earliest date. If the PROPERTY RECOVERY DATE is unknown, enter the date of the report. If no property has been recovered, enter *Not Applicable* (77777777).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, #25 PROPERTY RECOVERY DATE, and Transmission Data Element TD#3 FILE CREATION DATE.

324 PROPERTY INVOLVEMENT other than Recovered requires that PROPERTY RECOVERY DATE be Not Applicable

If PROPERTY INVOLVEMENT is not *Recovered* (05), all occurrences of PROPERTY RECOVERY DATE must be *Not Applicable* (77777777).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #25 PROPERTY RECOVERY DATE.

326 Not Applicable in an occurrence of PROPERTY RECOVERY DATE requires Not Applicable in all successive occurrences

If an occurrence of PROPERTY RECOVERY DATE is entered as *Not Applicable* (77777777), all successive occurrences also must be reported as *Not Applicable* (77777777).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #25 PROPERTY RECOVERY DATE.

328 Use the actual number of vehicles, or Not Applicable, in NUMBER OF MOTOR VEHICLES STOLEN

Enter the actual number of stolen vehicles in the NUMBER OF MOTOR VEHICLES STOLEN field. If more than 500 vehicles were stolen, enter *501*.

If the property stolen did not include any motor vehicles, enter *Not Applicable (777)*. While *Unknown (999)* is also an acceptable choice, use of it should be avoided. The correct number of vehicles, or the best approximation of that number, should be determined and reported.

Since NCIC requires the separate entry of each motor vehicle stolen, many agencies create a separate incident report for each stolen motor vehicle in order to facilitate subsequent investigation and data entry should the vehicle be recovered. Therefore, it is most likely that the number of stolen motor vehicles in any incident will always be one for agencies using this reporting practice.

EXAMPLE: A car-carrier truck loaded with 5 new vehicles awaiting delivery is stolen. The NUMBER OF MOTOR VEHICLES STOLEN in this incident would be *006* (the truck and five new cars) unless the one-vehicle-per-incident reporting practice was used by the agency.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #26 NUMBER OF MOTOR VEHICLES STOLEN.

329 PROPERTY TYPE must have at least one occurrence of a Stolen Motor Vehicle type

If PROPERTY INVOLVEMENT status is *Stolen (07)* and the NUMBER OF MOTOR VEHICLES STOLEN field contains a number between 001-501, then at least one occurrence of PROPERTY TYPE must be reported as *Automobiles (31)*, *Buses (33)*, *Trucks (34)*, *Recreational Vehicles (37)*, or *Other Motor Vehicles (38)*.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #26 NUMBER OF MOTOR VEHICLES STOLEN.

330 NUMBER OF MOTOR VEHICLES STOLEN field must be Not Applicable when PROPERTY INVOLVEMENT is other than Stolen

If PROPERTY INVOLVEMENT status is a choice other than *Stolen (07)*, then the NUMBER OF MOTOR VEHICLES STOLEN must be *Not Applicable (777)*.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #26 NUMBER OF MOTOR VEHICLES STOLEN.

331 The number of motor vehicle types reported in PROPERTY TYPE may not be greater than the number reported in NUMBER OF MOTOR VEHICLES STOLEN

The number of different motor vehicle types reported in PROPERTY TYPE must be less than or equal to the number of vehicles in the NUMBER OF MOTOR VEHICLES STOLEN field.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #26 NUMBER OF MOTOR VEHICLES STOLEN.

NYS NIBRS Error Messages and Explanations

332 Use the actual number of vehicles, or Not Applicable, in NUMBER OF MOTOR VEHICLES RECOVERED

If the NUMBER OF MOTOR VEHICLES RECOVERED = a number between 001 through 500 motor vehicles, then enter the actual number of recovered vehicles in the NUMBER OF MOTOR VEHICLES RECOVERED field. If more than 500 vehicles were RECOVERED, enter 501 in the NUMBER OF MOTOR VEHICLES RECOVERED.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #27 NUMBER OF MOTOR VEHICLES RECOVERED.

333 PROPERTY TYPE must have at least one occurrence of a Recovered Motor Vehicle property type

If PROPERTY INVOLVEMENT status is *Recovered* (05) and between 1 and 501 motor vehicles have been entered in the NUMBER OF MOTOR VEHICLES RECOVERED field, then at least one occurrence of PROPERTY TYPE must be reported as *Automobiles* (31), *Buses* (33), *Trucks* (34), *Recreational Vehicles* (37), or *Other Motor Vehicles* (38).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #27 NUMBER OF MOTOR VEHICLES RECOVERED.

334 NUMBER OF MOTOR VEHICLES RECOVERED must be Not Applicable when PROPERTY INVOLVEMENT is not Recovered

If PROPERTY INVOLVEMENT status is a choice other than *Recovered* (05), the NUMBER OF MOTOR VEHICLES RECOVERED must be reported as *Not Applicable* (777).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #27 NUMBER OF MOTOR VEHICLES RECOVERED.

335 The number of motor vehicle types reported in PROPERTY TYPE may not be greater than the number reported in NUMBER OF MOTOR VEHICLES RECOVERED

The number of different motor vehicle types reported in PROPERTY TYPE must be less than or equal to the number of vehicles in the NUMBER OF MOTOR VEHICLES RECOVERED field.

See Data Elements #22 PROPERTY INVOLVEMENT, #23, PROPERTY TYPE, and #27 NUMBER OF MOTOR VEHICLES RECOVERED.

336 SOURCE OF DRUG DATA should be Estimate, Laboratory, or Not Applicable

SOURCE OF DRUG DATA is used only to identify the source of data on Drugs or Narcotics seized in a drug case. In this case, PROPERTY INVOLVEMENT is *Seized* (06), and PROPERTY TYPE is *Drugs/Narcotics* (26). If it is not a drug seizure incident, SOURCE OF DRUG DATA should be reported as *Not Applicable* (7).

The correct source of data should be reported as either Estimate or Laboratory Analysis. While *Unknown* (9) is also an acceptable choice, use of it should be avoided. If the corresponding occurrence of PROPERTY TYPE is *Not Reported* (88) or *Unknown* (99), the SOURCE OF DRUG DATA field must be *Not Applicable* (7).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #28 SOURCE OF DRUG DATA.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

340 Use a valid choice in DRUG TYPE

DRUG TYPE is used only to identify the type of Drugs or Narcotics seized when PROPERTY TYPE is *Drugs/Narcotics* (26) and PROPERTY INVOLVEMENT is *Seized* (06). Otherwise, enter DRUG TYPE as *None/Not Applicable* (00).

The correct type of drug should be determined if possible and reported. While *Unknown Type* (99) is an acceptable choice, use of it should be avoided. If the first occurrence of the PROPERTY TYPE field is reported as *Not Applicable* (77), then all occurrences of the DRUG TYPE field also must be *None/Not Applicable* (00).

Enter up to 3 types of drugs in DRUG TYPE. If more than three drug types are seized in the incident, the two most important are to be reported specifically using their applicable DRUG TYPE choices and the remaining drugs are to be entered as 97, for *Over 3 Drug Types*. The reporting agency determines the most important drugs in such cases, based on the quantity, value, and deadliness of the drugs seized.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #29 DRUG TYPE.

342 DRUG TYPE requires a PROPERTY TYPE of Drugs/Narcotics

If an incident involves a drug seizure, it must include a choice for the type of drug (DRUG TYPE), a PROPERTY INVOLVEMENT of *Seized* (06), and a PROPERTY TYPE indicating *Drugs/Narcotics* (26).

Correspondingly, if DRUG TYPE is *None/Not Applicable* (00), PROPERTY TYPE cannot contain a choice indicating *Drugs/Narcotics* (26).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, and #29 DRUG TYPE.

344 Over 3 Drug Types may be entered only in the third occurrence of DRUG TYPE

The choice of *Over 3 Drug Types* (97) may be entered only in the third and final occurrence of the DRUG TYPE field. It may be used only if each of the first two occurrences contain a valid drug choice and more than one other drug type remain to be reported. *None/Not Applicable* (00) or *Unknown* (99) must not be used prior to the use of *Over 3 Drug Types* (97).

If three drug types are involved in an incident, enter one type in each of the three occurrences. If more than three drug types are involved, the two most important are to be reported in the first two occurrences. The remaining drugs are to be entered as *Over 3 Drug Types* (97) in the third occurrence. The reporting agency determines the most important drugs in such cases, based on quantity, value, and deadliness of the drugs seized.

See Data Element #29 DRUG TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

348 Over 3 Drug Types requires two previous known drug types in DRUG TYPE

The use of *Over 3 Drug Types* (97) in the third and final occurrence of the DRUG TYPE field requires that the first two occurrences of the field contain two different drug-type choices. *None/Not Applicable* (00) may not be used. While *Unknown Type* (99) and *Other Drugs* (69) are acceptable choices, use of them should be avoided. The correct types of drugs should be determined if possible.

If more than three drug types are involved, the two most important drugs are to be reported in the first two occurrences. The remaining drugs are to be entered as *Over 3 Drug Types* (97) in the third occurrence. The reporting agency determines the most important drugs in such cases, based on quantity, value, and deadliness of the drugs seized.

See Data Element #29 DRUG TYPE.

352 Each combination of DRUG TYPE and DRUG MEASUREMENT UNIT must be unique

An incident involving a drug seizure allows for up to three occurrences in the corresponding DRUG TYPE, DRUG QUANTITY, and DRUG MEASUREMENT UNIT fields to be entered. Each drug type and measurement combination [other than Drug Type = *None/Not Applicable* (00) Drug Measurement Unit = (Not Applicable (NA) or Drug Type = *Unknown Type* (99) or Drug Measurement = *Unknown* (XX)] must be unique.

While *Unknown Type* (99) Drug Type and *Unknown* (XX) Drug Measurement Unit are acceptable choices, use of these choices should be avoided. The correct type of drug and appropriate measurement unit should be determined if possible and reported.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, #29 DRUG TYPE, and #31 DRUG MEASUREMENT UNIT.

354 Use of Over 3 Drug Types in DRUG TYPE requires Not Applicable in DRUG QUANTITY

The use of *Over 3 Drug Types* (97) in the third and final occurrence of the DRUG TYPE field requires that the third occurrence of the DRUG QUANTITY field be *Not Applicable* (77777777 777). A quantity may not be entered because over three Drug Types means that two or more types of drugs are contained in this occurrence of DRUG TYPE; their combined quantity in this circumstance would be meaningless.

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, #29 DRUG TYPE, and #30 DRUG QUANTITY.

356 Use of Over 3 Drug Types in DRUG TYPE requires Not Applicable in DRUG MEASUREMENT UNIT

The use of *Over 3 Drug Types* (97) in the third and final occurrence of the DRUG TYPE field requires that the third occurrence of the DRUG MEASUREMENT UNIT field be *Not Applicable* (NA). *Over 3 Drug Types* (97) means that two or more drug types are combined in this third occurrence of Drug Type. Since they are grouped together, their quantities cannot be distinguished. Their combined quantity would be meaningless for crime reporting purposes. Therefore, DRUG MEASUREMENT UNIT would be *Not Applicable* (NA).

See Data Elements #22 PROPERTY INVOLVEMENT, #23 PROPERTY TYPE, #29 DRUG TYPE, and #31 DRUG MEASUREMENT UNIT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

358 DRUG TYPE of None/Not Applicable in the first occurrence requires None/Not Applicable in the second and third occurrences

Whenever the first occurrence of the DRUG TYPE field is reported as *None/Not Applicable* (00), all occurrences of DRUG TYPE must also be *None/Not Applicable* (00).

DRUG TYPE is used only to identify the type of Drugs/Narcotics seized where PROPERTY INVOLVEMENT is *Seized*; otherwise, DRUG TYPE is reported as *None/Not Applicable* (00).

See Data Elements #22 PROPERTY INVOLVEMENT and #29 DRUG TYPE.

360 DRUG TYPE of None/Not Applicable in the first occurrence requires that SOURCE OF DRUG DATA be Not Applicable

Whenever the first occurrence of the DRUG TYPE field is reported as *None/Not Applicable* (00), the first occurrence of SOURCE OF DRUG DATA must be *Not Applicable* (7).

SOURCE OF DRUG DATA describes whether the information in the DRUG TYPE, DRUG QUANTITY, and DRUG MEASUREMENT UNIT fields are based on Estimates or on the results of Laboratory Analysis.

SOURCE OF DRUG DATA is used only to identify the source of data on Drugs/Narcotics seized in a drug case where PROPERTY INVOLVEMENT is *Seized* (06); otherwise, SOURCE OF DRUG DATA should be reported as *Not Applicable* (7).

See Data Elements #22 PROPERTY INVOLVEMENT, #28 SOURCE OF DRUG DATA, and #29 DRUG TYPE.

362 DRUG TYPE of None/Not Applicable requires DRUG QUANTITY of Not Applicable

Whenever any occurrence of the DRUG TYPE field is reported as *None/Not Applicable* (00), then the corresponding occurrence of the SOURCE OF DRUG DATA field also must be *Not Applicable* (7).

See Data Elements #29 DRUG TYPE and #30 DRUG QUANTITY.

364 DRUG TYPE of None/Not Applicable requires DRUG MEASUREMENT UNIT of Not Applicable

Whenever any occurrence of DRUG TYPE is reported as *None/Not Applicable* (00), the corresponding occurrence of the DRUG MEASUREMENT UNIT must be *Not Applicable* (NA). DRUG MEASUREMENT UNIT specifies the unit of weight or volume of drugs seized in a drug case where PROPERTY INVOLVEMENT is *Seized* (06). When no drugs are seized, there is no measurement of them.

See Data Elements #29 DRUG TYPE and #31 DRUG MEASUREMENT UNIT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

372 A known drug type in the first occurrence of DRUG TYPE requires that SOURCE OF DRUG DATA be Estimate, Laboratory, or Unknown

If the first occurrence of the DRUG TYPE field contains any of the known drug type choices, or Unknown Type, the SOURCE OF DRUG DATA field must contain *Estimate* (1), *Laboratory Analysis* (2), or *Unknown* (9). *Not Applicable* (7) may not be used as a source when actual drug types or suspected drugs of unknown composition are reported as *Seized* (06). While *Unknown* (9) is an acceptable choice for SOURCE OF DRUG DATA, use of it should be avoided. The correct source of data should be determined and reported.

See Data Elements #22 PROPERTY INVOLVEMENT, #28 SOURCE OF DRUG DATA, and #29 DRUG TYPE.

374 DRUG QUANTITY can be Not Applicable only when DRUG TYPE is None/Not Applicable or Over 3 Drug Types

If any occurrence of DRUG TYPE contains any of the known drug type choices, or *Unknown Type* (99), the same occurrence of DRUG QUANTITY must contain a valid quantity. *None/Not Applicable* (00) may not be entered when actual drug types or suspected drugs of unknown composition are reported as *Seized* (06). Use of *Not Reported* (888888888 888) and *Unknown* (999999999 999) for DRUG QUANTITY should be avoided. The correct quantity of drugs should be determined if possible or the best approximation of that amount or number made.

Only DRUG TYPE entries of *None/Not Applicable* or *Over Three Drug Types* (97) may have *Not Applicable* (777777777 777) in DRUG QUANTITY.

See Data Elements #29 DRUG TYPE and #30 DRUG QUANTITY.

376 DRUG MEASUREMENT UNIT can be Not Applicable only when DRUG TYPE is None/Not Applicable or Over 3 Drug Types

If any occurrence of DRUG TYPE contains any of the known drug type choices, or *Unknown Type* (99), the same occurrence of DRUG MEASUREMENT UNIT must contain a valid unit of measurement. *Not Applicable* (NA) may not be entered when actual drug types or suspected drugs of unknown composition are reported as *Seized* (06). Use of *Unknown* (XX) for the DRUG MEASUREMENT UNIT should be avoided. The correct measurement unit should be determined if possible and reported.

Only when DRUG TYPE is *None/Not Applicable* (00) or *Over 3 Drug Types* (97) can DRUG MEASUREMENT UNIT be *Not Applicable* (NA).

See Data Elements #29 DRUG TYPE and #31 DRUG MEASUREMENT UNIT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

378 DRUG QUANTITY must be numeric

DRUG QUANTITY serves only to record the estimated quantity of drugs seized in a case where PROPOERTY INVOLVEMENT is *Seized* (06). Otherwise, all occurrences will be entered as *None/Not Applicable* (01).

DRUG QUANTITY is a 12-character numeric field. It is divided into a 9-digit whole-number portion on the left and a 3-digit fractional portion on the right and is transmitted to DCJS in this format. If the whole-number portion of the quantity contains fewer than 9 numerals, fill it with zeros on the left side and then enter the total 9 characters into the left portion. If the fractional portion contains fewer than 3 numerals, fill it with zeros on the right side and enter all 3 characters into the right portion.

Use of *Unknown* (999999999 999) and *Not Reported* (888888888 888) for DRUG QUANTITY should be avoided. The correct quantity of a drug, or the best approximation, should be determined if possible and reported.

EXAMPLE 1: If *Over 3 Drugs* (97) is used in an occurrence of DRUG TYPE, the corresponding occurrence of DRUG QUANTITY should be entered as *Not Applicable* (777777777 777).

EXAMPLE 2: An occurrence of 1.5 kilograms of Crack should be entered as 000000001 500.

EXAMPLE 3: If 2.0 liquid ounces of Morphine were seized, enter it as 000000002 000.

See Data Elements #29 DRUG TYPE and #30 DRUG QUANTITY.

380 DRUG QUANTITY of Not Applicable requires that DRUG MEASUREMENT UNIT be Not Applicable

Whenever any occurrence of DRUG QUANTITY is reported as *Not Applicable* (777777777 777), the corresponding occurrence of DRUG MEASUREMENT UNIT must also be *Not Applicable* (NA).

See Data Elements #30 DRUG QUANTITY and #31 DRUG MEASUREMENT UNIT.

382 DRUG QUANTITY of Not Reported or Unknown requires that DRUG MEASUREMENT UNIT be Unknown

Whenever any occurrence of DRUG QUANTITY is reported as *Not Reported* (888888888 888) or *Unknown* (999999999 999), the corresponding occurrence of DRUG MEASUREMENT UNIT also must be *Unknown* (XX).

NYS NIBRS Error Messages and Explanations

NO. **ERROR MESSAGE AND EXPLANATION**
386 **Use valid DRUG MEASUREMENT UNIT appropriate to drug**

The DRUG MEASUREMENT UNIT is used as the basis of volume, count, or weight of seized drugs. A unit of measurement must be reported for each occurrence of DRUG QUANTITY. The correct measurement unit for the drug type and quantity seized must be chosen from the following choices:

Units of Drug Measurement

Capacity

Fluid ounce (FL)
Gallon (GL)
Liter (LT)
Milliliter (ML)

Units

Dosage Units (DU) [Capsules, Tablets, etc.]
Number of Plants (NP)

Weight

Gram (GM)
Kilogram (KG)
Ounce (OZ)
Pound (LB)

While *Unknown* (XX) is an acceptable choice for the DRUG MEASUREMENT UNIT, use of it should be avoided. The correct measurement unit should be determined if possible and reported.

Only when DRUG TYPE and DRUG QUANTITY are Drug Type = *None/Not Applicable* (00) Drug Quantity = *Not Applicable* (777777777 777) or *Over 3 Drug Types* (97) can DRUG MEASUREMENT UNIT be reported as *Not Applicable* (NA).

See Data Elements #29 DRUG TYPE, #30 DRUG QUANTITY, and #31 DRUG MEASUREMENT UNIT.

388 DRUG MEASUREMENT UNIT of Not Applicable requires that DRUG QUANTITY be Not Applicable

If an occurrence of DRUG MEASUREMENT UNIT is *Not Applicable* (NA), the corresponding occurrence of DRUG QUANTITY must be *Not Applicable* (777777777 777).

See Data Elements #30 DRUG QUANTITY and #31 DRUG MEASUREMENT UNIT.

389 DRUG MEASUREMENT UNIT of Unknown requires that DRUG QUANTITY be Not Reported or Unknown

If an occurrence of DRUG MEASUREMENT UNIT is *Unknown* (XX), the corresponding occurrence of DRUG QUANTITY must be *Not Reported* (888888888 888) or *Unknown* (999999999 999).

See Data Elements #30 DRUG QUANTITY and #31 DRUG MEASUREMENT UNIT.

390 DRUG MEASUREMENT UNIT of Not Applicable requires that successive occurrences be Not Applicable

If the first or second occurrence of DRUG MEASUREMENT UNIT is reported as *Not Applicable* (NA), the successive occurrence(s) must always be reported as *Not Applicable* (NA).

See Data Elements #30 DRUG QUANTITY and #31 DRUG MEASUREMENT UNIT.

See Data Elements #29 DRUG TYPE and #31 DRUG MEASUREMENT UNIT.

394 OFFENDER NUMBER must be specified between 001 and 099, or 999 if Unknown

Each offender in an incident must be assigned a unique OFFENDER NUMBER from 001 to 099. A separate Offender Segment containing OFFENDER AGE, OFFENDER SEX, OFFENDER RACE, OFFENDER ETHNIC ORIGIN, AND OFFENDER CONDITION fields is to be submitted for each numbered offender.

If the offender is unknown, submit a single Offender Segment with 999 entered in the OFFENDER NUMBER field and Unknown in the OFFENDER AGE, OFFENDER SEX, OFFENDER RACE, OFFENDER ETHNIC ORIGIN, AND OFFENDER CONDITION fields.

Most agency Records Management System (RMS) software will automatically assign and count the number of offender segments entered. Alternatively, agency forms can have pre-numbered lines for each offender that will be keyed into the RMS when the incident data are entered.

This variable is used in the VICTIM/OFFENDER LINK field to link victims to offenders. It is also important to the edits that confirm any relationship between the victim and offender reported in the VICTIM/OFFENDER RELATIONSHIP field.

EXAMPLE 1: A corpse with multiple bullet wounds was found in an abandoned warehouse. There were no witnesses to the crime and no suspects. A single Offender Segment should be submitted with an OFFENDER NUMBER of 999 and *Unknown* entered in the five offender-demographic/condition fields (999, U, U, U, U).

EXAMPLE 2: Two offenders were seen fleeing the scene of a burglary. Two Offender Segments should be submitted: one with Offender Number 001 entered and the other with Offender Number 002. Each segment should report any witness statements about the corresponding offender's age, sex, race, ethnic origin, or condition in the appropriate fields.

See Data Elements #32 OFFENDER NUMBER, #33 OFFENDER AGE, #34 OFFENDER SEX, #35 OFFENDER RACE, #36 OFFENDER ETHNIC ORIGIN, and #37 OFFENDER CONDITION.

396 Unknown OFFENDER NUMBER requires Unknown OFFENDER AGE

If the offender is unknown and *Unknown* (999) was entered in OFFENDER NUMBER, the corresponding OFFENDER AGE also must be reported as *Unknown* (9999).

OFFENDER AGE is a four-character numeric field. It may have a specific age, age range, or *Unknown* (9999) entered, in the following formats:

0001-0098	Specific age in years
0099	Over 98 years old
9999	Unknown

Age Range: Must be in order of lowest to highest age as a four-character code, e.g., *1921* would be an age range of 19 to 21 years of age. The first pair of digits must be greater than zero and less than the second pair of digits. The second pair of digits must be less than 99.

See Data Elements #32 OFFENDER NUMBER and #33 OFFENDER AGE.

398 Unknown OFFENDER NUMBER requires Unknown OFFENDER SEX

If the offender is unknown and *Unknown* (999) was entered in OFFENDER NUMBER, the corresponding OFFENDER SEX also must be reported as *Unknown* (U).

OFFENDER SEX is a one-character alpha field. It may contain only one of the following valid choices:

M	Male
F	Female
U	Unknown
R	Not Reported

See Data Elements #32 OFFENDER NUMBER and #34 OFFENDER SEX.

400 Unknown OFFENDER NUMBER requires Unknown OFFENDER RACE

If the offender is unknown and *Unknown* (999) was entered in OFFENDER NUMBER, the corresponding OFFENDER RACE also must be reported as *Unknown* (U).

OFFENDER RACE is a one-character alpha field. It may only contain one of the following valid choices:

W	White
B	Black/African American
I	American Indian/Alaskan Native
A	Asian
P	Native Hawaiian/Pacific Islander
R	Not Reported
U	Unknown

See Data Elements #32 OFFENDER NUMBER and #35 OFFENDER RACE.

402 Unknown OFFENDER NUMBER requires Unknown OFFENDER ETHNIC ORIGIN

If the offender is unknown and *Unknown* (999) was entered in OFFENDER NUMBER, the corresponding OFFENDER ETHNIC ORIGIN also must be reported as *Unknown* (U).

OFFENDER ETHNIC ORIGIN is a one-character alpha field. It may contain only one of the following valid choices:

H	Hispanic/Latino
N	Not Hispanic/Latino
R	Not Reported
U	Unknown

See Data Elements #32 OFFENDER NUMBER and #36 OFFENDER ETHNIC ORIGIN.

404 Unknown OFFENDER NUMBER requires Unknown OFFENDER CONDITION

If the offender is unknown and *Unknown* (999) was entered in OFFENDER NUMBER, the corresponding OFFENDER CONDITION also must be reported as *Unknown* (U).

This variable is used to indicate the apparent condition of each offender involved in the incident. Use the most descriptive code if more than one applies. Enter only one of the following choices for each offender:

01	Appears to be Impaired with Drugs
02	Appears to be Impaired with Alcohol
03	Appears to be Mentally Disordered
04	Appears to be Injured/Ill
05	Apparently Normal
88	Not Reported
99	Unknown

See Data Elements #32 OFFENDER NUMBER and #37 OFFENDER CONDITION.

406 Use exact age, age range, or Unknown OFFENDER AGE

OFFENDER AGE is a four- character numeric field. It must be entered in the following formats:

0001-0098	specific age in years
0099	Over 98 years old
9999	Unknown

Age Range: Must be in order of lowest to highest age as a four-character code, e.g., *1921* would be an age range of 19 to 21 years of age. The first pair of digits must be greater than zero and less than the second pair of digits. The second pair of digits must be less than 99.

EXAMPLE: The witness reported the offender's age as between 25 and 30 years old. Enter the age range of *2530*.

416 VICTIM NUMBER must be in range of 001 to 999

Each victim in an incident must be assigned a unique victim number from 001 to 999. A separate Victim Segment must be submitted for each numbered victim.

Most agency Records Management System (RMS) software will automatically assign and count the number of victim segments (screens) entered. Alternatively, agency forms can have pre-numbered lines for each victim that will be keyed into the RMS when the incident is data entered.

See Data Element #38 VICTIM NUMBER.

418 VICTIM/OFFENSE LINK must be numeric

VICTIM/OFFENSE LINK is a two-character numeric field. Each occurrence must be filled with a unique two-digit number. If the number is in the range of 1-9, zero left fill the field. The number to be used is obtained from the OFFENSE NUMBER of an offense perpetrated against the victim whose information is being entered. Most agency Records Management System (RMS) software will automatically assign and enter OFFENSE NUMBERS.

While a maximum of only ten offenses may be included in any one incident, the numbers used may be any valid number in the range of 01 to 75. It is not necessary that Offense Segments be numbered consecutively if they are unique. Each victim must be linked to at least one and no more than ten offenses. When fewer than 10 offenses are present for the victim, enter *Not Applicable (77)* in any unused occurrences of VICTIM/OFFENSE LINK.

See Data Elements #12 OFFENSE NUMBER and #39 VICTIM/OFFENSE LINK.

420 VICTIM/OFFENSE LINK must be in range of 01 to 75, or Not Applicable

VICTIM/OFFENSE LINK is a two-character numeric field. Each occurrence must be filled with a unique two-digit number. The number to be used is obtained from the OFFENSE NUMBER of an offense perpetrated against the victim whose information is being entered.

While a maximum of only ten offenses may be included in any one incident, the numbers used may be any valid number in the range of 01 to 75. It is not necessary that Offense Segments be numbered consecutively if they are unique. Each victim must be linked to at least one and no more than ten offenses. See Data Elements #12 OFFENSE NUMBER and #39 VICTIM/OFFENSE LINK.

422 VICTIM/OFFENSE LINK required; first occurrence must show valid OFFENSE NUMBER

Each victim in an incident must always be linked through the VICTIM/OFFENSE LINK to at least one offense. The first occurrence of VICTIM/OFFENSE LINK must be filled with a two-digit number. The number to be used is obtained from the OFFENSE NUMBER of an offense perpetrated against the victim whose information is being entered.

The number used must be a valid number in the range of 01 to 75. If the number obtained is in the range of 01 through 09, be sure to zero left fill the field. *Not Applicable (77)* must not be used in the first occurrence of the VICTIM/OFFENSE LINK.

424 VICTIM/OFFENSE LINK of Not Applicable requires Not Applicable in successive occurrences

Once any occurrence of VICTIM/OFFENSE LINK is reported as *Not Applicable (77)*, all following occurrences must always be reported as *Not Applicable (77)*.

VICTIM/OFFENSE LINK is a two-character numeric field. Each occurrence must be filled with a unique two-digit number. If the number is in the range of 1-9, zero left fill the field. The number to be used is obtained from the OFFENSE NUMBER of an offense perpetrated against the victim whose information is being entered.

See Data Elements #12 OFFENSE NUMBER and #39 VICTIM/OFFENSE LINK.

426 Duplicate VICTIM/OFFENSE LINK not allowed

Except for *Not Applicable (77)*, no occurrence of VICTIM/OFFENSE LINK can equal another occurrence of this data element.

428 Use valid choices for VICTIM TYPE

VICTIM TYPE is a one-character alpha field. An incident may have more than one victim. Victims may be persons, businesses, various types of institutions, and society. A Victim Segment should be completed for each victim with the most appropriate choice entered in VICTIM TYPE. Enter only one code for each victim, using one of the following choices:

A	Firefighter
I	Individual
B	Business
F	Financial Institution
G	Government
L	Law Enforcement Officer
R	Religious Organization
S	Society/Public
O	Other

I	American Indian/Alaskan Native
A	Asian
P	Native Hawaiian/Pacific Islander
R	Not Reported
U	Unknown

See Data Element #43 VICTIM RACE.

476 **VICTIM ETHNIC ORIGIN must be Hispanic/Latino, Not Hispanic/Latino, Not Reported, Unknown, or Not Applicable**

A valid VICTIM ETHNIC ORIGIN choice must be entered for person victims. Ethnicity is entered separately because it is possible to be a White person of Hispanic or Latino origin, and so forth. For this data element, a person is either Hispanic or Not Hispanic, regardless of race. *Not Applicable (X)* is not allowed for person victim types [*Individual (I), Firefighter (A), Law Enforcement Officer (L)*].

Valid Ethnic Origin choices for person victims are:

H	Hispanic/Latino
N	Not Hispanic/Latino
R	Not Reported
U	Unknown

See Data Element #44 VICTIM ETHNIC ORIGIN.

NYS NIBRS Error Messages and Explanations

478 Use valid choice for VICTIM RESIDENCE STATUS

Enter a valid Victim Residence Status choice for each victim.

Not Applicable (77) must be entered for the following Victim Types: *Business (B)*, *Financial Institution (F)*, *Government (G)*, *Religious Organization (R)*, *Society/Public (S)*, *Other (O)*, or *Unknown (U)*.

If the Victim Type is Individual (I), Firefighter (A) or Law Enforcement Officer (L), then the Victim Residence Status must be one of the following variables:

- 01 = Resident
- 02 = Commuter
- 03 = Tourist
- 04 = Military
- 05 = Student
- 06 = Temporary Resident/Foreign National
- 07 = Other Status
- 08 = Homeless
- 88 = Not Reported
- 99 = Unknown

EXAMPLE 1: If the victim was robbed in White Plains, NY, where he resides, select *Resident (01)*.

EXAMPLE 2: The victim was a Mexican citizen working as a migrant worker and temporarily residing in the town where his radio was stolen. Select *Temporary Resident/Foreign National (06)*.

See Data Element #45 VICTIM RESIDENCE STATUS.

480 VICTIM/OFFENDER LINK must be numeric digits with zero left-fill

VICTIM/OFFENDER LINK reports that there is a connection between the victim and one or more offenders in the incident. The primary or lead offender is numbered 001, the next one 002, the next 003, and so forth up to 10. If no primacy of offenders is apparent, number them arbitrarily. Up to 10 offenders can be linked with victims.

VICTIM/OFFENDER LINK exists between persons only: it used to link individual victims to offenders who victimized them. Thus, if the victim is not an individual person, all occurrences of VICTIM/OFFENDER LINK must be entered as *Not Applicable (777)*.

Use Not Applicable to fill multiple occurrences of VICTIM/OFFENDER LINK when fewer than 10 offenders are involved in the victimization of an individual victim.

EXAMPLE 1: If Victim 001's relationship to Offender 004 is to be reported, enter 004 in the first occurrence of VICTIM/OFFENDER LINK for the first victim, and enter all remaining occurrences as *Not Applicable (777)*.

EXAMPLE 2: If the victim was being linked to two offenders, numbered 001 and 005, the first occurrence of VICTIM/OFFENDER LINK would have 001 entered, the second occurrence would have 005 entered, and the remaining eight occurrences would be filled with *Not Applicable (777)*.

See Data Element #46 VICTIM/OFFENDER LINK.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

482 VICTIM /OFFENDER LINK can be Unknown only in the first occurrence

VICTIM/OFFENDER LINK is used only to link individual victims to offenders who victimized them. Thus, if the victim is not an individual person [VICTIM TYPE = *Business (B)*, *Financial Institution (F)*, *Government (G)*, *Religious Organization (R)*, *Society/Public (S)*, *Other (O)*, or *Unknown (U)*], then all occurrences of VICTIM/OFFENDER LINK must be entered as *Not Applicable (777)*.

If the victim is a person, and the offender is unknown, the first occurrence of VICTIM/OFFENDER LINK must contain *Unknown (999)*. All occurrences afterward are *Not Applicable (777)*.

See Data Element #46 VICTIM/OFFENDER LINK.

484 VICTIM/OFFENDER LINK with Unknown Offender in first occurrence requires all successive occurrences be Not Applicable

VICTIM/OFFENDER LINK is used only to link individual victims to offenders who victimized them. Thus, if the victim is not an individual person, all occurrences of VICTIM/OFFENDER LINK must be entered as *Not Applicable (777)*.

If the victim is a person, and the offender is Unknown, the first occurrence of VICTIM/OFFENDER LINK contains *Unknown (999)*, all occurrences afterward are *Not Applicable (777)*.

See Data Element #46 VICTIM/OFFENDER LINK.

486 VICTIM/OFFENDER LINK of Not Applicable in any occurrence requires Not Applicable in all successive occurrences

Up to 10 offenders can be linked with a single victim. Enter a separate number for each offender as 001, 002, etc. VICTIM/OFFENDER LINK is used only to link individual victims to offenders who victimized them. Thus, if the victim is not an individual person, all occurrences of VICTIM/OFFENDER LINK must be entered as *Not Applicable (777)*.

Not Applicable (777) is also used to fill the last multiple occurrences of VICTIM/OFFENDER LINK when fewer than 10 offenders are involved in the victimization of an individual victim.

EXAMPLE: If Victim 001's relationship to Offender 002 is to be reported, enter 002 in the first occurrence of VICTIM/OFFENDER LINK for the first victim, and enter all remaining occurrences as *Not Applicable (777)*. If there are other offenders linked to Victim 001, these must be entered before any *Not Applicable (777)* choices are entered. The only choice allowed after a *Not Applicable (777)* entry in VICTIM/OFFENDER LINK is *Not Applicable (777)* in the remaining occurrences.

See Data Element #46 VICTIM/OFFENDER LINK.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

488 VICTIM/OFFENDER LINK occurrences may not contain duplicate OFFENDER NUMBERS

VICTIM/OFFENDER LINK is used only to link individual victims to offenders who victimized them. Thus, if the victim is not an individual person, all occurrences of VICTIM/OFFENDER LINK must be *Not Applicable (777)*.

VICTIM/OFFENDER LINK cannot have any duplicate entries other than *Not Applicable (777)*. Thus, an offender number (Offender 001, 002, etc.) is used only once in a VICTIM/OFFENDER LINK to connect that offender with that victim, regardless of how many offenses might be involved. This link is used only to establish that there is a connection between offender and person-victim.

Not Applicable (777) is used to fill the last multiple occurrences of VICTIM/OFFENDER LINK when fewer than 10 offenders are involved in the victimization of an individual victim.

EXAMPLE: If Victim 001's relationship to Offender 003 is to be reported, enter 003 in the first occurrence of VICTIM/OFFENDER LINK for the first victim, and enter all remaining occurrences as *Not Applicable (777)*.

See Data Element #46 VICTIM/OFFENDER LINK

490 Every occurrence of VICTIM/OFFENDER RELATIONSHIP must contain a valid relationship choice

An incident may have more than one victim. Victims may be persons, businesses, various types of institutions, and society. Only person victims can have relationships to offenders. If the VICTIM TYPE is one of the following:

- A Firefighter
- I Individual
- L Law Enforcement Officer

choose the most appropriate from the various NYS NIBRS relationship choices for each corresponding occurrence of VICTIM/OFFENDER RELATIONSHIP.

Not Reported (88) may be chosen when necessary but should be avoided if possible. An effort should always be made to ascertain the correct relationship between the victim and the offender whenever the victim is a person. If no information about the offender is available, better choices would be *Relationship Unknown (40)* or *Stranger (41)*, if they are appropriate.

Not Applicable (77) must be entered for all other occurrences of VICTIM/OFFENDER RELATIONSHIP for the VICTIM TYPES listed below.

- B Business
- F Financial Institution
- G Government
- R Religious Organization
- S Society/Public
- O Other
- U Unknown

See Data Elements #40 VICTIM TYPE and #47 VICTIM/OFFENDER RELATIONSHIP.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

494 VICTIM/OFFENDER RELATIONSHIP of Not Applicable in any occurrence requires Not Applicable in all successive occurrences

Only person victims can have relationships to offenders. Enter up to 10 occurrences of VICTIM/OFFENDER RELATIONSHIP using the NYS NIBRS choices.

Not Applicable (77) is used to fill the last multiple occurrences of VICTIM/OFFENDER RELATIONSHIP when fewer than 10 offenders are involved in the victimization of an individual victim. *Not Applicable (77)* is also used to fill all 10 occurrences of VICTIM/OFFENDER RELATIONSHIP when the victim is not a person. The appearance of *Not Applicable (77)* after an actual relationship choice in one or more first occurrences signal that no other victim-offender relationship is recorded for this incident. Every occurrence after the first *Not Applicable (77)* also must be *Not Applicable (77)*.

EXAMPLE: A gang robs a bank. Since the victim was a financial institution, not a person, there is no VICTIM/OFFENDER RELATIONSHIP. Enter *Not Applicable (77)* in all 10 occurrences.

EXAMPLE 2: A young man was punched in the stomach on the street and his iPod taken from around his neck. He did not know either of his assailants by name but recognized them as two older students at his school. The total of 10 occurrences of VICTIM/OFFENDER RELATIONSHIP for this incident will contain two occurrences of *Otherwise Known (30)*, and eight occurrences of *Not Applicable (77)*. The entries are made in the following required order: the two relationships to the victim must be entered in the first and second occurrences of VICTIM/OFFENDER RELATIONSHIP, as *Otherwise Known (30)*. *Not Applicable (77)* must fill occurrences three through ten.

See Data Element #47 VICTIM/OFFENDER RELATIONSHIP.

496 VICTIM AGE does not reflect the spousal type of relationship reported in VICTIM/OFFENDER RELATIONSHIP

If a VICTIM/OFFENDER RELATIONSHIP is reported as *Spouse* or *Ex-Spouse*, and an exact age was reported in the VICTIM AGE field, it must be greater than or equal to 10 years of age.

VICTIM AGE is checked by the DCJS system to confirm that it is within a reasonable range that is compatible with the relationship reported. If the relationship is in error, ascertain the correct VICTIM/OFFENDER RELATIONSHIP, correct it, and resubmit. Valid VICTIM/OFFENDER RELATIONSHIP choices may be found in Data Element #47. If the age was misreported, then correct and resubmit it.

See Data Elements #41 VICTIM AGE and #47 VICTIM/OFFENDER RELATIONSHIP.

498 A linked Victim and Offender requires a corresponding relationship in VICTIM/OFFENDER RELATIONSHIP other than Not Applicable

Only person victims can have relationships to offenders. Once a victim and offender are linked in VICTIM/OFFENDER LINK, the nature of their link must be reported in VICTIM/OFFENDER RELATIONSHIP. *Not Applicable (77)* may not be used.

EXAMPLE: An employee assaulted his employer with his fists. The VICTIM/OFFENDER LINK connected these two individuals (employee as Offender 001 and employer as Victim 001). Since the VICTIM/OFFENDER RELATIONSHIP always states the relationship of the victim, this must be reported as *Employer (25)*.

See Data Elements #46 VICTIM/OFFENDER LINK and #47 VICTIM/OFFENDER RELATIONSHIP.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

499 Only one Victim Was the Offender relationship can be assigned to a specific offender

(Victim Segment) Cannot be submitted multiple times with #47-VICTIM/OFFENDER RELATIONSHIP = 70, when related Data Element #46 VICTIM/OFFENDER LINK contains the same data value (indicating the same offender). Each VICTIM/OFFENDER RELATIONSHIP is related to a VICTIM/OFFENDER LINK designated by having the same occurrence number. The VICTIM/OFFENDER LINK will share the same code as the OFFENDER NUMBER. When the VICTIM/OFFENDER RELATIONSHIP is Victim Was Offender (70), the related VICTIM/OFFENDER LINK coded cannot have a duplicate value to any other VICTIM/OFFENDER LINK in the same incident.

See Data Elements #46 VICTIM/OFFENDER LINK and #47 VICTIM/OFFENDER RELATIONSHIP

500 Not Applicable VICTIM/OFFENDER LINK requires Not Applicable VICTIM/OFFENDER RELATIONSHIP

VICTIM/OFFENDER LINK is used only to link individual person victims to offenders who victimized them. Therefore, if the victim is not an individual, all occurrences of VICTIM/OFFENDER LINK must be reported as *Not Applicable* (777), and each corresponding VICTIM/OFFENDER RELATIONSHIP also must be *Not Applicable* (777).

When fewer than 10 offenders are involved in the victimization of an individual victim, *Not Applicable* (777) fills the unused occurrences of VICTIM/OFFENDER LINK and VICTIM/OFFENDER RELATIONSHIP.

EXAMPLE: A man robs a bank of \$1700. Since the victim was a financial institution, not a person, there is no link. Both the VICTIM/OFFENDER LINK and the VICTIM/OFFENDER RELATIONSHIP should be reported as *Not Applicable* (77).

See Data Elements #46 VICTIM/OFFENDER LINK and #47 VICTIM/OFFENDER RELATIONSHIP.

501 A victim can only have one spousal relationship. In this instance the victim has a VICTIM/OFFENDER RELATIONSHIP of spouse with 2 or more offenders.

Victim/Offender Relationship of *Spouse* (01) [may only be reported once per victim].

See Data Element #47 VICTIM/OFFENDER RELATIONSHIP.

502 VICTIM/OFFENDER LINK of Unknown in first occurrence requires a VICTIM/OFFENDER RELATIONSHIP of Unknown in the first occurrence and Not Applicable in all successive occurrences

When the first occurrence of VICTIM/OFFENDER LINK is *Unknown* (777), it is not possible to have a known VICTIM/OFFENDER RELATIONSHIP, and the latter must be reported as *Relationship Unknown* (40). This occurs only when the original OFFENDER NUMBER was reported as *Unknown* (999) because there were no witnesses or suspects. After the initial reporting of *Unknown* (999) for both fields, no links or relationships for the victim may follow. All subsequent occurrences of both VICTIM/OFFENDER LINK and VICTIM/OFFENDER RELATIONSHIP must be *Not Applicable* (777).

See Data Elements #46 VICTIM/OFFENDER LINK and #47 VICTIM/OFFENDER RELATIONSHIP.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

503 An offender can only have one spousal relationship. In this instance 2 or more victims have a VICTIM/OFFENDER RELATIONSHIP of spouse with the offender.

Victim/Offender Relationship of *Spouse* (01) may only be reported once per offender.

See Data Element #47 VICTIM/OFFENDER RELATIONSHIP and Data Element #32 OFFENDER NUMBER.

504 LEVEL OF INJURY is required for all victims identified as person victims in VICTIM TYPE

If a victim is reported with a VICTIM TYPE of *Individual* (I), *Law Enforcement Officer* (L), or *Firefighter* (A), the corresponding LEVEL OF INJURY must not be reported as *Not Applicable* (7). The LEVEL OF INJURY choices are:

- 1 = Dead
- 2 = Appeared to Be Seriously Injured
- 3 = Appeared to Be Physically Injured, But Not Seriously
- 4 = Not Injured

Use of *Not Reported* (8) and *Unknown* (9) should be avoided if possible.

See Data Element #48 LEVEL OF INJURY.

505 LEVEL OF INJURY must be completed for every victim regardless of Victim Type

Every incident requires an offense, a victim, and an offender. No matter what VICTIM TYPE is reported, each of the related victim fields must have a valid data choice entered.

When the type of victim is not a person, *Not Applicable* [VICTIM AGE = 7777, VICTIM SEX = X, VICTIM RACE = X, VICTIM ETHNIC ORIGIN = X, VICTIMRESIDENCE STATUS = 77] must be entered in all of the fields other than VICTIM TYPE, VICTIM NUMBER, VICTIM/OFFENSE LINK, and VICTIM/OFFENDER LINK.

EXAMPLE: An incident report is taken concerning a business that had suffered a burglary by an unknown offender. The incident would have an entry for Victim Type, a Victim Number, a link between victim (business) and offense (burglary), and a link between victim (business) and offender (unknown). Since the other descriptors of the victim (such as age, race, and residence status) do not apply to a business, these would be filled in with *Not Applicable* [VICTIM AGE = 7777, VICTIM SEX = X, VICTIM RACE = X, VICTIM ETHNIC ORIGIN = X, VICTIMRESIDENCE STATUS = 77]. The important thing is to leave none of the victim fields, including LEVEL OF INJURY, blank. Use of *Not Reported* (8) or *Unknown* (9) is allowed by the NYS NIBRS edits, however, their use should be avoided because they indicate default entries rather than affirmative ones and contribute needlessly to high proportions of *Unknown* (9) and *Not Reported* (8) data values in the agency's IBR reporting.

The use of *Not Applicable* (7) is the most appropriate because it specifically recognizes that the victim is not a person and that such descriptors as age and injury level are not relevant in this incident. When the type of victim is a person [*Individual* (I), *Firefighter* (A) or *Law Enforcement Officer* (L)]. LEVEL OF INJURY must be filled in with a choice other than *Not Applicable* (7), as explained in **Error Message 504**.

See Data Elements #40 VICTIM TYPE, #48 LEVEL OF INJURY, and #38 - #50 for all the victim descriptors.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

506 TYPE OF INJURY for a person victim must contain an injury type other than Not Applicable in the first occurrence

The TYPE OF INJURY field pertains only to physical bodily injuries suffered by person victims. If a victim is reported with a VICTIM TYPE of *Individual (I)*, *Law Enforcement Officer (L)*, or *Firefighter (A)*, the first corresponding TYPE OF INJURY must not be reported as *Not Applicable (77)*. The TYPE OF INJURY choices include:

- 00 = None
- 01 = Apparent Broken Bones
- 02 = Possible Internal Injury
- 03 = Severe Laceration
- 04 = Loss of teeth
- 05 = Unconsciousness
- 06 = Other Major Injury
- 07 = Apparent Minor Injury

Use of *Not Reported (88)* and *Unknown (99)* should be avoided if possible. If the victim died, the field should be used to report the apparent cause of death, such as *Severe Laceration (03)*.

If no apparent physical injuries to the victim as a result of the crime were observed by the officers or reported by the victim or witnesses, the first occurrence of TYPE OF INJURY should be reported as *None (00)*. The remaining four occurrences of the field should be reported as *Not Applicable (77)*.

EXAMPLE: The offender assaulted the victim with a tire iron, breaking the victim's arm and opening up a cut about three inches long and one inch deep on his back. The first occurrence of TYPE OF INJURY should be *Apparent Broken Bones (01)*, the second occurrence should be *Severe Laceration (03)*, and the remaining three occurrences reported as *Not Applicable (77)*.

See Data Elements #40 VICTIM TYPE and #49 TYPE OF INJURY.

507 TYPE OF INJURY must be completed for every victim regardless of Victim Type

Every incident requires at least one victim. Not matter what VICTIM TYPE is reported, all of the victim fields corresponding to that victim require that data be entered. When the victim type is not one of those categories representing an individual person, *Not Applicable* (must be entered in all of the victim fields other than VICTIM TYPE, VICTIM NUMBER, VICTIM/OFFENSE LINK, and VICTIM/OFFENDER LINK [VICTIM AGE = 7777, VICTIM SEX = X, VICTIM RACE = X, VICTIM ETHNIC ORIGIN = X, VICTIMRESIDENCE STATUS = 77]. Leave none of the victim fields blank.

Use of *Not Reported* or *Unknown* is allowed by the NYS NIBRS edits, however, their use should be avoided because they indicate default entries rather than affirmative ones, contributing needlessly to high proportions of Unknowns and Not Reported in the agency's IBR reporting. The use of *Not Applicable* is the most appropriate because it specifically recognizes that the victim, for example *Society/Public*, is not a person and that such descriptors as age and type of injury are not relevant in this victim.

When the type of victim is a person (*Individual, Firefighter, or Law Enforcement Officer*), TYPE OF INJURY must be filled in with a choice other than *Not Applicable*, as explained in **Error Message 506**.

See Data Elements #40 VICTIM TYPE and #49 TYPE OF INJURY, and #38 - #50 for all the victim descriptors.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

508 TYPE OF INJURY for a person victim type must contain a known injury type or Not Applicable in second and successive occurrences

The TYPE OF INJURY field pertains only to physical bodily injuries suffered by person victims. If a victim is reported with a VICTIM TYPE of *Individual*, *Law Enforcement Officer*, or *Firefighter*, the second and successive TYPE OF INJURY fields must not be reported as *None* (00), *Not Reported* (88) or *Unknown* (99). Valid choices are:

- 01 = Apparent Broken Bones
- 02 = Possible Internal Injury
- 03 = Severe Laceration
- 04 = Loss of teeth
- 05 = Unconsciousness
- 06 = Other Major Injury
- 07 = Apparent Minor Injury
- 77 = Not Applicable

If only one apparent physical injury to the victim, as the result of the crime, were observed by the officers or reported by the victim or witnesses, the second through fifth occurrences of TYPE OF INJURY should be reported as *Not Applicable* (77).

See Data Elements #40 VICTIM TYPE and #49 TYPE OF INJURY.

510 TYPE OF INJURY cannot have duplicate occurrences of same type except for Not Applicable

When completing the five occurrences of the TYPE OF INJURY field, each of them must be a unique valid entry. Except for *Not Applicable* (77), no two may be the same.

EXAMPLE: Two men picked a fight with a third man outside a bar. The third man received several cuts from the knife used by one of the first two. Enter one occurrence of *Severe Laceration* (03) in TYPE OF INJURY, even though the victim sustained many cuts. It is the type of injury, not the number of injuries, which is entered. Fill the remaining occurrences with *Not Applicable* (77).

See Data Element #49 TYPE OF INJURY.

512 VICTIM MEDICAL TREATMENT is required for all victims identified as person victims in VICTIM TYPE

If a victim is reported with a VICTIM TYPE of *Individual* (I), *Firefighter* (A), or *Law Enforcement Officer* (L), the corresponding VICTIM MEDICAL TREATMENT may not be reported as *Not Applicable* (7). Valid VICTIM MEDICAL TREATMENT choices are:

- 1 = Hospitalized
- 2 = Treated and Released
- 3 = Refused Treatment
- 4 = Not Treated
- 5 = Treated at Scene

Use of *Not Indicated in Report* (8) and *Unknown* (9) should be avoided if possible. If the victim died, the field should be used to report the level of any treatment rendered to the deceased.

EXAMPLE: The offender assaulted the victim with a tire iron, breaking the victim's arm and opening a cut about three inches long and one inch deep on his back. The victim was taken to the emergency room of a local hospital to have his arm set and the cut closed by stitches but was not hospitalized overnight. The proper choice would be *Treated and Released* (2).

See Data Elements #40 VICTIM TYPE and #50 VICTIM MEDICAL TREATMENT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

513 VICTIM MEDICAL TREATMENT must be completed for every victim regardless of Victim Type

Every incident requires at least one victim. Not matter what VICTIM TYPE is reported, all of the victim fields corresponding to that victim require that data be entered.

When the victim type is not one of those categories representing an individual person, all of the victim fields other than VICTIM TYPE, VICTIM NUMBER, VICTIM/OFFENSE LINK, and VICTIM/OFFENDER LINK must be *Not Applicable* [VICTIM AGE = 7777, VICTIM SEX = X, VICTIM RACE = X, VICTIM ETHNIC ORIGIN = X, VICTIMRESIDENCE STATUS = 77].

Leave none of the victim fields blank, including VICTIM MEDICAL TREATMENT.

Use of *Not Indicated in Report* (8) or *Unknown* (9) is allowed by the NYS NIBRS edits, however, their use should be avoided because they indicate default entries rather than affirmative ones, contributing needlessly to high proportions of and *Not Indicated in Report* (8) data values in an agency's IBR reporting.

The use of *Not Applicable* (7) for non-person victims is the most appropriate because it specifically recognizes that the Victim Type, for example *Society/Public* (S), is not a person and that such descriptors as age and type of injury are not relevant.

When the type of victim is a person [(*Individual* (I), *Firefighter* (A), *Law Enforcement Officer* (L))], VICTIM MEDICAL TREATMENT must be filled in with a choice other than *Not Applicable*, as explained in **Error Message 512**.

See Data Elements #40 VICTIM TYPE and #50 VICTIM MEDICAL TREATMENT, and #38 - #50 for all the victim descriptors.

514 ARRESTEE NUMBER must be numeric in range of 01 to 99

Each arrestee in an incident is to be assigned a unique number from 01 to 99. A separate Arrestee Segment containing Data Elements #51 through #65 is to be submitted for each numbered arrestee. RMS software should automatically assign and count the number of arrestee screens entered. If there is no arrestee, do NOT submit this segment.

If two persons are arrested in an incident, 2 Arrestee Segments should be submitted (one or each arrestee). See Data Element #51 ARRESTEE NUMBER.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

516 AGENCY ARREST NUMBER must be left-justified

The AGENCY ARREST NUMBER uniquely identifies the case transaction number which the agency has assigned to an arrest. The number must be 12 or fewer characters long to fit into the 12- position alpha-numeric field. If the number takes up less than 12 positions, it must be entered from left to right (left justified) and the unused positions on the right left blank.

The number entered may be either the INCIDENT NUMBER of the previously reported incident or a separate arrest transaction number. Both NYS NIBRS and the FBI both accept any contributor-defined, 12-character transaction number. However, if an agency wishes also to be compatible with DCJS' Computerized Criminal History System (CCH), it should limit the number to 8 alpha-numeric characters. In this case, the final four positions on the right of the field will remain blank.

Whenever one or more arrests is reported, a separate Arrestee Segment containing Data Elements #51 through #65 is to be completed for each numbered arrestee. The AGENCY ARREST NUMBER must have a valid number entered. It may not be blank and may not contain any embedded blanks within the number assigned.

See Data Elements #2 INCIDENT/ COMPLAINT NUMBER and #52 AGENCY ARREST NUMBER.

518 AGENCY ARREST NUMBER cannot be all blanks or have embedded blanks

The AGENCY ARREST NUMBER uniquely identifies the case transaction number which the agency has assigned to an arrest. Whenever one or more arrests is reported, a separate Arrestee Segment containing Data Elements #51 through #65 is to be completed for each numbered arrestee.

The AGENCY ARREST NUMBER must have a valid number entered. It may not be all blanks and may not contain any embedded blanks within the number assigned. The only blanks allowed are those used as right-fill after a number of fewer than 12 characters.

See Data Elements #2 INCIDENT/ COMPLAINT NUMBER and #52 AGENCY ARREST NUMBER.

520 Use allowed characters for AGENCY ARREST NUMBER: A-Z, 0-9, hyphen, blank right-fill

The AGENCY ARREST NUMBER uniquely identifies the case transaction number which the agency has assigned to an arrest. Whenever one or more arrests is reported, a separate Arrestee Segment containing Data Elements #51 through #65 is to be completed for each numbered arrestee.

The AGENCY ARREST NUMBER must be some combination of the following characters only: letters A-Z, numbers 0-9, or a hyphen. The only blanks allowed are those used as right-fill after a number of fewer than 12 characters.

See Data Element #52 AGENCY ARREST NUMBER.

522 CRIMINAL JUSTICE TRACKING NUMBER (CJTN) must be Not Applicable

To comply with the National Incident Based Reporting System (NIBRS), the NYS Crime Reporting Program no longer accepts CJTN number as part of a NYS NIBRS submission. Arrestee's CJTN must default to 77777777 (Not Applicable)

See Data Element #53 CJTN NUMBER.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

524 NYSID NUMBER must be Unknown

To comply with the National Incident Based Reporting System (NIBRS), the NYS Crime Reporting Program no longer accepts NYSID number as part of a NYS NIBRS submission. Arrestee's NYSID Number must default to 9999999J (Unknown)

See Data Element #54 NYSID NUMBER.

525 ARREST DATE must be formatted as YYYYMMDD

ARREST DATE is the year, month, and day when the subject was arrested. It is mandatory and must be entered as a valid calendar date, correctly formatted as YYYYMMDD.

YYYY	Four-digit year, e.g.,	2029
MM	Two-digit month, e.g.,	01
DD	Two-digit day, e.g.,	30

This ARREST DATE of January 30, 2029 would appear as 20290130.

See Data Element #55 ARREST DATE.

526 ARREST DATE must be on or after IBR start-up date

ARREST DATE is the year, month, and day when the subject was arrested. It must be on or after the start-up date for IBR submission by the local agency in order to be processed by the NYS NIBRS system and added to the state database. It must be entered as a valid calendar date and correctly formatted as YYYYMMDD.

See Data Element #55 ARREST DATE.

528 ARREST DATE cannot be later than submitted IBR MONTH and IBR YEAR

ARREST DATE is the year, month, and day when the subject was arrested. It must be prior to the submitted IBR MONTH and IBR YEAR, which is the month and year of the IBR submission file being sent to DCJS.

See Data Element #55 ARREST DATE and Transmission Data Elements IBR MONTH and IBR YEAR

530 ARREST TYPE must contain a valid choice

If more than one ARREST TYPE applies in an incident, report the one that best summarizes the reason for arrest. As a rule, this should be the type of situation that preceded the incident.

Valid ARREST TYPE choices include the following:

01	=	Complaint
02	=	Crime in Progress
04	=	Court Summons
05	=	Order of Protection
06	=	Other

NOTE: Arrest Warrant is NOT a valid choice.

See Data Element #56 ARREST TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

532 ARREST STATUS must contain a valid choice

Enter the type of release from physical custody for an arrestee. If more than one ARREST STATUS applies in an incident, report the one that best summarizes the reason for arrest. This should be the type that initiated the release. The ARREST STATUS choices are:

- 01 = Held
- 02 = Appearance Ticket
- 03 = ROR
- 04 = Cash Bail
- 05 = Bail Bond
- 06 = Police Bail
- 07 = Released to Third Party

Use of *Not Reported* (88) and *Unknown* (99) should be avoided if possible.

See Data Element #57 ARREST STATUS.

534 JUVENILE RELEASE STATUS must contain a valid choice

To comply with national crime reporting standards, “juveniles” are defined as young people under 18. DCJS forwards data on arrests of young people under 18 to the FBI, thus remaining compatible with other states in the national crime reporting program. However, under New York law, “juveniles” are defined as young people under 16. The JUVENILE RELEASE STATUS choices accommodate these age differences for crime reporting purposes.

Every arrest of a juvenile (under 18) must be accounted for by choosing the relevant code for the immediate outcome of the arrest. Adult arrest segments must include this field, as well. Only four choices are possible:

- H Handled Within Department (e.g., released to parents, released with warning)
- R Referred to Criminal Court, Family Court, or Probation Intake
- D Diverted to Counseling or Treatment Program
- X Not Applicable (arrestee is 18 years old or older)

The **Not Applicable** (X) choice is to be used only when the arrestee is an adult under New York law.

The Handled Within Department (H) and *Diverted to Counseling or Treatment Program* (D) choices may be used when the law enforcement agency, for example, arranges with the parents in a shoplifting case to pay for store merchandise stolen or damaged, or arranges for anger management class in another case, or assigns the arrestee to group counseling. These choices allow for the potentially wide range of non-court, non-intake arrest outcomes which may be available locally.

The *Referred to Criminal Court, Family Court, or Probation Intake* (R) choice is to be used for those young people accused of the more serious crimes, whose cases may involve formal charges.

See Data Elements #58 JUVENILE RELEASE STATUS and #61 ARRESTEE AGE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

536 ARRESTEE AGE of under 16 requires JUVENILE RELEASE STATUS

If ARRESTEE AGE is under 16, the JUVENILE RELEASE STATUS is required and must be one of the following:

D	Diverted to Counseling or Treatment Program
H	Handled Within Department
R	Referred to Criminal Court/Family Court, or Probation Intake.

See Data Elements #58 JUVENILE RELEASE STATUS and # 61 ARRESTEE AGE.

538 ARRESTEE AGE of over 17 requires a JUVENILE RELEASE STATUS of Not Applicable

If ARRESTEE AGE is greater than 17, the JUVENILE RELEASE STATUS must be *Not Applicable (X)* because persons aged 18 and up are not juveniles.

See Data Elements #58 JUVENILE RELEASE STATUS # 61 ARRESTEE AGE.

540 MULTIPLE CLEARANCE INDICATOR must contain a valid choice

This data element is used to indicate whether the apprehension of the arrestee resulted in the clearance of more than one previously reported incident within the agency's jurisdiction.

If more than one incident, it is important to indicate that only one arrestee was responsible for multiple clearances. This is done by entering *M* for Multiple into all but one of the Arrestee Segments involved and *C* for Count Arrestee into the remaining Arrestee Segment. If the arrest did not result in multiple clearances, enter *N* for Not Applicable.

See Data Element # 59 MULTIPLE CLEARANCE INDICATOR.

542 First occurrence of ARRESTEE WEAPONS must contain a valid Weapon Type or None/Not Applicable

ARRESTEE WEAPONS is used to indicate that the arrestee was armed with some type of weapon; it is not a count of the number of weapons in the subject's possession. Record the weapon type(s) used in resisting arrest or at any other time when apprehended.

If any weapon is found with the arrestee, enter the most appropriate descriptive choice from the 19 types listed under ARRESTEE WEAPONS into the first occurrence of the field. If no weapon was present, enter *None/Not Applicable (77)*.

See Data Element # 60 ARRESTEE WEAPONS.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

544 Second occurrence of ARRESTEE WEAPONS may contain only valid Weapon Types or Not Applicable

ARRESTEE WEAPONS is used to indicate that the arrestee was armed with some type of weapon; it is not a count of the number of weapons in the subject's possession. Record the weapon type(s) used in resisting arrest or at any other time when apprehended.

If only one weapon was found, enter None/Not Applicable in the second occurrence. If two different weapon types were found with the arrestee, enter the most appropriate descriptive choices for each from the 19 types listed under ARRESTEE WEAPONS in the two occurrences of the field.

If two weapons of the same type were found, they must not be entered twice: enter only one type. A maximum of two weapon types can be listed.

See Data Element # 60 ARRESTEE WEAPONS.

546 Unique weapon types are required in the two occurrences of ARRESTEE WEAPONS

Each entry must be unique; duplicates of types are not allowed. Two weapons of the same kind should be entered as a single weapon type. If two different weapon types were found with the arrestee, enter the most appropriate descriptive choices from the 19 types listed under ARRESTEE WEAPONS in the two occurrences of the field. A maximum of two weapon types can be listed.

See Data Element #60 ARRESTEE WEAPONS.

548 Second occurrence of ARRESTEE WEAPONS must be None/Not Applicable

If the first occurrence of ARRESTEE WEAPONS is reported as None/Not Applicable, the second occurrence must be entered as *None/Not Applicable (77)*.

Confirm the actual circumstances and correct the entries. If the second occurrence contains a valid weapon type that was found on the arrestee, the weapon type must be entered into the first occurrence. If no weapon was found, the second occurrence should be changed to *None/Not Applicable (77)*.

See Data Element #60 ARRESTEE WEAPONS.

550 ARRESTEE AGE must be numeric in range of 01 to 99

ARRESTEE AGE requires an exact age, not an age range, to be entered. If uncertain, enter best guess.

Acceptable values are:

01-98	Exact age in years
99	Over 98 years old

EXAMPLE: The arrestee refused to give his date of birth but appeared to be 35 to 40 years old. The reporting agency entered 38 as his age, as an estimate. The record should be updated when the exact age becomes known.

See Data Element #61 ARRESTEE AGE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

552 ARRESTEE SEX must be Male or Female

Acceptable values are:

M	Male
F	Female

See Data Element #62 ARRESTEE SEX.

554 ARRESTEE RACE must be White, Black/African American, Native American/Alaskan Native, Asian, Native Hawaiian/Pacific Islander, Not Reported or Unknown

Acceptable values are:

W	White
B	Black/African American
I	American Indian/Alaskan Native
A	Asian
P	Native Hawaiian/Pacific Islander
R	Not Reported
U	Unknown

If race is in doubt and arrestee refuses to provide his/her race, the entry should be Unknown.

See Data Element #63 ARRESTEE RACE.

556 ARRESTEE ETHNIC ORIGIN must be Hispanic/Latino or Not Hispanic/Latino

Ethnic Origin is not the same as race. For purposes of crime reporting, ethnic origin is defined only in terms of Hispanic and Not Hispanic. It is possible to be *White (W)* and *Hispanic/Latino, (H)* or *White (W)* and *Not Hispanic/Latino (N)*. If the arrestee refuses to answer this question, enter *Unknown (U)*.

Acceptable values are:

H	Hispanic or Latino
N	Not Hispanic or Latino
R	Not Reported
U	Unknown

See Data Element #64 ARRESTEE ETHNIC ORIGIN.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

558 ARRESTEE RESIDENCE STATUS requires a valid residence status

Acceptable values are:

R	Resident
N	Nonresident
F	Foreign Nonresident
U	Unknown

Law enforcement agencies should base their determinations of arrestee residency on the town, city, or community where the crime occurred rather than the agency's broader geographical jurisdictions.

EXAMPLE 1: A crime occurred in Locke, NY. The Cayuga County Sheriff arrested the accused at his home in Kelloggsville in the same county. The residency code would be reported as *Nonresident* (N), even though both towns are in the jurisdiction of the sheriff.

EXAMPLE 2: A crime occurred in White Plains, NY, and the arrestee maintained his residence in that city. The entry would be *Resident* (R).

See Data Element #65 ARRESTEE RESIDENCE STATUS.

560 ARRESTEE/CHARGE LINK must be numeric in range of 01 to 99

For each arrestee reported there must also be at least one ARREST CHARGE reported. The charge(s) must be linked to the arrestee(s) by entering the ARRESTEE NUMBER in the ARRESTEE/CHARGE LINK field associated with each crime charged.

Both the number and link are formatted as 2-character numeric fields. Since there can be up to 99 arrestees reported, the numbers that are valid for use in the ARRESTEE/CHARGE LINK field are 01 through 99.

See Data Elements #51 ARRESTEE NUMBER and #66 ARRESTEE/CHARGE LINK.

562 ARREST CHARGE is not a valid NYS Law

All police Record Management Systems (RMS) used by NYS NIBRS agencies must contain the DCJS Coded Law File. The local agency is responsible for maintaining its system copy of the law file. Make sure that the current files are properly loaded into your system. The latest NYS Coded Law File is available on the DCJS Website at: <http://www.criminaljustice.ny.gov/crimnet/clf/rel-db/rel-db.htm>.

Confirm that the correct charge was entered in the ARREST CHARGE. Every NYS NIBRS agency RMS known to DCJS provides a pull-down menu of criminal offenses that may be charged based on the NYS Coded Law File and normally doesn't require the manual data entry of the coded field itself. If the correct charge was entered and the error still occurs, the agency can check the codes in the monthly submission file. A review of the field that returns this error should show the first 21 characters of ARREST CHARGE as an exact match with an offense code from the current DCJS Coded Law File. The coding structure of the field is explained under ARREST CHARGE. The 22nd and final character of the field is the "Attempt Indicator" (See error message 564 below). For further help, contact your RMS vendor or DCJS.

See Data Element #67 ARREST CHARGE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

564 The Attempt Indicator following the NYS Law code in the ARREST CHARGE must be C for Completed or A for Attempted

The 22nd and final character of Data Element #67 ARREST CHARGE is the ATTEMPT INDICATOR. If the offense entered in the first 21 characters was completed, it must be filled with a C. If the offense was attempted but not completed, an A should be entered. Most systems show this as a separate field on computer screens and place the character into the last position of the field when creating the monthly submission file.

See Data Element #67 ARREST CHARGE.

566 ARREST CHARGE cannot be Justifiable Homicide

09C is not a valid ARREST CHARGE. If a justifiable homicide occurs in the context of a criminal incident, it is to be reported as a separate incident without an arrest. It must not be reported as part of the crime that was being committed when the justifiable homicide took place. Therefore, justifiable homicide cases involve recording two incidents rather than one.

See Data Elements #20 JUSTIFIABLE HOMICIDE CIRCUMSTANCE and #67 ARREST CHARGE.

568 ARREST LARCENY TYPE requires a valid larceny type

If an arrestee is charged with a larceny offense, ARREST LARCENY TYPE must contain a matching valid larceny type selection. The classification choices below are necessary because the NYS Penal Law identifies the offense as a larceny but does not indicate detail about the *type* of larceny.

ARREST LARCENY TYPE choices are:

- 01 = Pocket-Picking
- 02 = Purse-Snatching
- 03 = Shoplifting
- 04 = Theft from a Building
- 05 = Theft from a Coin-Operated Machine or Device
- 06 = Theft from a Motor Vehicle
- 07 = Theft of Motor Vehicle Parts or Accessories
- 08 = Theft from Mailbox
- 09 = All Other Larcenies
- 10 = Motor Vehicle Theft

If no larceny was involved, check that the correct offense was reported and use *Not Applicable* (77) in this field. Use of *Not Reported* (88) and *Unknown* (99) should be minimized.

EXAMPLE: The arrestee is charged with stealing a hood ornament from the victim's car. Report the larceny type as *Theft of Motor Vehicle Parts or Accessories* (07).

See Data Elements #67 ARREST CHARGE and #68 ARREST LARCENY TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

570 ARREST LARCENY TYPE must have corresponding larceny offense in ARREST CHARGE field

If the ARREST LARCENY TYPE field contains one of the following valid larceny type selections,

- 01 = Pocket-Picking
- 02 = Purse-Snatching
- 03 = Shoplifting
- 04 = Theft from a Building
- 05 = Theft from a Coin-Operated Machine or Device
- 06 = Theft from a Motor Vehicle
- 07 = Theft of Motor Vehicle Parts or Accessories
- 08 = Theft from Mailbox
- 09 = All Other Larcenies
- 10 = Motor Vehicle Theft

then the corresponding ARREST CHARGE field must contain a matching larceny offense. If no larceny was involved, check that the correct offense was reported and change the ARREST LARCENY TYPE to *Not Applicable* (77).

See Data Elements #68 ARREST LARCENY TYPE and #67 ARREST CHARGE.

572 ARREST CHARGE is a larceny and requires a valid ARREST LARCENY TYPE

If the ARREST CHARGE field contains a valid larceny offense, the corresponding ARREST LARCENY TYPE field must contain a matching valid larceny type. The larceny type field cannot be submitted as *Not Applicable* (77) for a larceny offense. Use of *Not Reported* (88) and *Unknown* (99) should be avoided.

See Data Elements #68 ARREST LARCENY TYPE and #67 ARREST CHARGE.

574 Incident submitted as Initial Time Window, Update Time Window, or Delete requires valid TIME WINDOW TYPE

NYS NIBRS can process an incident that occurred prior to the local agency's NIBRS start-up date only if the agency reports it as an Initial Submission of an Inactive Incident (also known as a Time Window Submission), an Update to an Inactive Incident (also known as a Time Window Update), or a Delete of an Inactive Incident. These actions may be submitted only when specific changes have occurred in a previously inactive case, and a very limited amount of information may be submitted. The type of change being made must be reported in the TIME WINDOW TYPE field using one of the following valid choices:

- 1 = Exceptional Clearance Only
- 2 = Recovered Property Only
- 3 = Arrest Only
- 4 = Exceptional Clearance with Recovered Property
- 5 = Arrest with Recovered Property

See Transmission Data Element: TD#6 TIME WINDOW TYPE.

576 The first occurrence of INCIDENT/COMPLAINT OFFENSE in a Time Window incident must contain a valid NYS Law

Make sure that the charge is entered correctly and that your coded law file is up to date. The latest NYS Coded Law File is available on the DCJS website at:

<http://www.criminaljustice.ny.gov/crimnet/clf/rel-db/rel-db.htm>.

The first 21 characters of an occurrence of INCIDENT/COMPLAINT OFFENSE must be an exact match with the DCJS Coded Law File.

See Data Element #13 INCIDENT/COMPLAINT OFFENSE.

577 The first occurrence of INCIDENT/COMPLAINT OFFENSE in a Time Window incident must include the Completed or Attempted indicator

If the first occurrence of an INCIDENT/COMPLAINT OFFENSE contains a valid NYS law, the 22nd character must be C for completed or A for attempted.

See Data Element #13 INCIDENT/COMPLAINT OFFENSE.

578 The first occurrence of INCIDENT LARCENY TYPE in a Time Window incident must contain a valid larceny type choice

If a larceny offense was reported in the first occurrence of INCIDENT/COMPLAINT OFFENSE, the corresponding occurrence of the INCIDENT LARCENY TYPE field must contain a matching larceny type selection. The only type which may not be used in a Time Window is Motor Vehicle Theft.

If no larceny was involved, check that the correct offense was reported and use Not Applicable (77) in this field. Use of Not Reported (88) and Unknown (99) should be minimized.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #14 INCIDENT LARCENY TYPE.

580 Multiple occurrences of INCIDENT/COMPLAINT OFFENSE in a Time Window incident must either contain valid NYS laws or be blank

Make sure that the charge is entered correctly and that your coded law file is up to date. The latest NYS Coded Law File is available on the DCJS website at:

<http://www.criminaljustice.ny.gov/crimnet/clf/rel-db/rel-db.htm>.

The first 21 characters of each occurrence of INCIDENT/COMPLAINT OFFENSE must be an exact 21-character match with an offense in the DCJS Coded Law File. The first occurrence must always contain a valid NYS law. The second and each succeeding offense, if any, must also match laws on the file. Once an occurrence has been left blank, no further laws may be entered, and all remaining occurrences must be blank.

See Data Element #13 INCIDENT/COMPLAINT OFFENSE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

581 Multiple occurrences of INCIDENT/COMPLAINT OFFENSE in a Time Window incident must include the Completed or Attempted indicator

Multiple occurrences of INCIDENT/COMPLAINT OFFENSE containing NYS Laws must include the 22nd character with each occurrence. It must be C for completed or A for Attempted.

See Data Element #13 INCIDENT/COMPLAINT OFFENSE.

582 Multiple occurrences of INCIDENT LARCENY TYPE in a Time Window incident must contain a valid larceny type

If a larceny offense was reported in any of the second through tenth occurrences of INCIDENT/ COMPLAINT OFFENSE, the corresponding INCIDENT LARCENY TYPE must contain a matching larceny type selection. The only larceny type which may not be used in a Time Window is Motor Vehicle Theft (240).

If no larceny was involved in an occurrence, confirm that the correct offense was reported and use *Not Applicable* (77) in INCIDENT LARCENY TYPE. *Not Reported* (88) and *Unknown* (99) must not be used. If an occurrence of INCIDENT/COMPLAINT OFFENSE has been left blank, the corresponding INCIDENT LARCENY TYPE also must be blank.

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #14 INCIDENT LARCENY TYPE.

584 Recovered property TIME WINDOW TYPE requires at least one completed Drug, Gambling, Kidnapping, or Crime Against Property offense in INCIDENT/COMPLAINT OFFENSE

If an incident submitted as a Time Window has a TIME WINDOW TYPE of *Recovered Property Only (2)*, *Exceptional Clearance with Recovered Property (4)*, or *Arrest with Recovered Property (5)*, it must have at least one completed occurrence of one of the following offenses in INCIDENT/COMPLAINT OFFENSE:

Drug/Narcotic Offenses

35A - Drug/Narcotic Violations

35B - Drug Equipment Violations

Gambling Offenses

39A - Betting/Wagering

39B - Operating/Promoting/assisting Gambling

39C - Gambling Equipment Violations

39D - Sports Tampering

100 - Kidnapping/Abduction

Crimes Against Property

23A – Pocket-Picking

23B – Purse-Snatching

23C – Shoplifting

23D – Theft from Building

23E – Theft from Coin-Operated Machine/Device

23F – Theft from Motor Vehicle

23G – Theft of Motor Vehicle Parts/Accessories

23H – All Other Larceny Offenses

240 – Motor Vehicle Theft

26A – False Pretense/Swindle/Confidence Game

26B – Credit Card/ATM Fraud

26C – Impersonation

26D – Welfare Fraud

26E – Wire Fraud

26F – Identity Theft

26G - Hacking/Computer Invasion

586 An arrest TIME WINDOW TYPE requires a TIME WINDOW CLEARANCE INDICATOR of either Yes or No

If TIME WINDOW TYPE contains *Arrest Only (3)* or *Arrest with Recovered Property (5)*, the CLEARANCE INDICATOR must be Yes (Y) [Incident cleared by this arrest] or No (N) [Incident not cleared by this arrest]. *Not Applicable (7)* must not be used.

See Transmission Data Elements TD#6 TIME WINDOW TYPE and TD#7 CLEARANCE INDICATOR.

588 Time Window with non-arrest TIME WINDOW TYPE requires a TIME WINDOW CLEARANCE INDICATOR of Not Applicable

If the TIME WINDOW TYPE is *Exceptional Clearance Only (1)*, *Recovered Property Only (2)*, or *Exceptional Clearance with Recovered Property (4)*, the TIME WINDOW CLEARANCE INDICATOR must be *Not Applicable (7)* since no arrest is being reported.

See Transmission Data Elements TD#6 TIME WINDOW TYPE and TD#7 TIME WINDOW CLEARANCE INDICATOR.

590 Time Window with occurrences of larceny in INCIDENT/COMPLAINT OFFENSE requires a valid larceny classification in each corresponding INCIDENT LARCENY TYPE

Initiating, updating, or deleting any larceny offense in a Time Window requires citation of the larceny offense in INCIDENT/COMPLAINT OFFENSE and an accompanying classification of larceny in the corresponding INCIDENT LARCENY TYPE. Larceny type can never be reported as *Not Applicable (77)* once a larceny is specified in INCIDENT/COMPLAINT OFFENSE.

Valid LARCENY TYPE selections are:

- 01 = Pocket-Picking
- 02 = Purse-Snatching
- 03 = Shoplifting
- 04 = Theft from a Building
- 05 = Theft from a Coin-Operated Machine/Device
- 06 = Theft from Motor Vehicle
- 07 = Theft of Motor Vehicle Parts/Accessories
- 09 = All Other Larceny Offenses

592 Time Window with occurrences of larceny types in INCIDENT LARCENY TYPE requires larceny offenses in each corresponding INCIDENT/COMPLAINT OFFENSE

When a larceny type is entered in INCIDENT LARCENY TYPE, a larceny offense is required in the corresponding INCIDENT/COMPLAINT OFFENSE. When no offense is entered, or a non-larceny offense is cited, this error message results. To correct it, enter a valid larceny offense in INCIDENT/COMPLAINT OFFENSE. The following larceny types will trigger this edit error if not matched with a larceny offense:

- 01 = Pocket-Picking
- 02 = Purse-Snatching
- 03 = Shoplifting
- 04 = Theft from a Building
- 05 = Theft from a Coin-Operated Machine or Device
- 06 = Theft from a Motor Vehicle
- 07 = Theft of Motor Vehicle Parts or Accessories
- 09 - All Other Larceny Offenses

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #14 INCIDENT LARCENY TYPE.

594 Time Window with any valid entries in occurrences two through ten of INCIDENT/ COMPLAINT OFFENSE requires corresponding INCIDENT LARCENY TYPE entries

If a Time Window incident contains any law citation in occurrences two through ten of INCIDENT/COMPLAINT OFFENSE, INCIDENT LARCENY TYPE must also contain an entry. If the offense field is not blank, the corresponding larceny type field must not be blank. If the offense field contains a law citation other than a larceny (23A, 23B, 23C, 23D, 23F, 23G, or 23H), then INCIDENT LARCENY OFFENSE should = Not *Applicable* (77).

See Data Element #13 INCIDENT/COMPLAINT OFFENSE and #14 INCIDENT LARCENY TYPE.

596 Time Window with any blank in occurrences two through ten of INCIDENT/ COMPLAINT OFFENSE requires a matching blank in corresponding INCIDENT LARCENY TYPE

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

600 Incident contains a segment with an invalid SEGACT code; check all segments in incident

Every NYS NIBRS file submitted to DCJS by a local agency is made up of data records extracted from the crime incidents on the agency's Records Management System (RMS). Each file has a beginning record called the "Header Segment" and an ending record called the "Trailer Segment." Between the Header and the Trailer, each incident is made up of other segments containing different types of information. They are Administrative, Offense, Property, Offender, Victim, Arrestee, Arrest Charge, and Time Window segments. The type and number of segments depend on the crime being reported.

In addition to the incident data it contains, each segment repeats the data that identifies the agency, reporting dates, incident, segment type (SEGTYPE), and directions for what is to be done with the incident data by NYS NIBRS (SEGACT). If error message 600 appears, one of the segments has an invalid SEGACT code, meaning that the directions field has been left blank or contains something other than the choices listed below.

Valid SEGACT codes are:

I	Initial "Active" Incident Submission
R	Replace "Active" Incident Submission
A	Add Arrestee Segment for "Active" Incident
D	Delete Segment
W	Initial "Inactive" Incident Submission (Time Window Submission)
U	Update to "Inactive" Incident Submission (Time Window Update)

These codes are generated by your RMS when creating the monthly file for submission. If the correct choices were data entered and the error message was received, contact the RMS vendor, or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

602 All segments within an incident must have the same SEGACT code

Each active incident may contain as many as 7 segment types. Regardless of whether it is the *Initial* (I) submission, a *Replacement* (R), a *Delete* (D) or an *Add Arrestee* (A), it must have an internally consistent SEGACT code.

For example, if it is a replacement incident, all the segments must be coded *R*, and the incident cannot have an Arrestee Segment coded as *A* for Add Arrestee. A SEGACT of *A* would be used only when adding an arrestee to a previously submitted active incident.

This error message is generated when one or more segments in an incident have blank or conflicting SEGACT codes. Check for the intended code and for segment consistency with it. These codes are generated by your RMS when creating the monthly file for submission. For further help, contact the RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

604 An Initial or Replace Active Incident may include only segments containing SEGTYPE codes 1 through 7

If an incident is either an Initial Active Incident (SEGACT = I) or a Replace Active Incident (SEGACT = R), segment types used may only include SEGTYPE codes 1-7. Codes for Time Window (8), Header (0), and Trailer (9) segments may not be used.

These codes are generated by your RMS when creating the monthly file for submission. If the correct data was entered and SEGTYPE codes are wrong, contact the RMS vendor or call DCJS.

Valid SEGTYPE codes are:

1	Administrative Segment
2	Offense Segment
3	Property Segment
4	Offender Segment
5	Victim Segment
6	Arrestee Segment
7	Arrest Charge Segment

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

606 Add Arrestee submitted for an Active Incident may include only Arrestee and Arrest Charge segments

An incident submitted to add an arrest to a previously reported incident (SEGACT = A) must contain only Arrestee Segments (SEGTYPE 6) and Arrest Charge Segments (SEGTYPE 7). These codes are generated by your RMS when creating the monthly file for submission. If the correct data was entered but codes are wrong, contact the RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

608 Initial or Updating Time Window submissions may include only Administrative, Property, Arrestee, Arrest Charge or Time Window Segments

An incident submitted as either an Initial Inactive Incident (Time Window) (SEGACT is W) or as an Update Inactive Incident (Time Window Update) (SEGACT is U) may contain only one of these SEGTYPEs:

1	Administrative Segment
3	Property Segment
6	Arrestee Segment
7	Arrest Charge Segment
8	Time Window Segment

These codes are generated by your RMS when creating the monthly file for submission. If the correct data was entered but codes are wrong contact the RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

610 When deleting an incident, only a single Administrative Segment or Time Window Segment may be used

All segments of an active incident are linked to the Administrative (1) segment. It contains all the identifying information for the processing program to find the intended incident. Submitting it with a SEGACT of D will delete the entire incident including all Arrestee (6) and Arrest Charge (7) Segments.

Correspondingly, the Time Window Segment (8) contains similar links for finding all segments of an inactive incident. Submitting it with a SEGACT of D will delete the entire inactive incident. No other segments are needed.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

612 Initial or Updating Time Window submissions must contain only one Time Window Segment per incident

An incident submitted as either an Initial Inactive Incident (Time Window) (SEGACT is W) or as an Update Inactive Incident (Time Window Update) (SEGACT is U) must contain one and only one Time Window Segment (SEGTYPE 8).

These codes are generated by your RMS when creating the monthly file for submission. For further help, contact the RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

614 Initial or Updating Time Window submissions may contain no more than one Property Segment per incident

An incident submitted as either an Initial Inactive Incident (Time Window) (SEGACT is W) or as an Update Inactive Incident (Time Window Update) (SEGACT is U) may contain one Property Segment (SEGTYPE 3).

These codes are generated by your RMS when creating the monthly file for submission. For further help, contact the RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

616 Initial or Updating Time Window submissions may contain no more than one Administrative Segment per incident

An incident submitted as either an Initial Inactive Incident (Time Window) (SEGACT is W) or as an Update Inactive Incident (Time Window Update) (SEGACT is U) may contain one Administrative Segment (SEGTYPE = 1).

These codes are generated by your RMS when creating the monthly file for submission. For further help, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

617 SEGTYPE must be in range of 1 to 8. Check SEGTYPE of all segments in the incident

SEGTYPE codes are used to identify the type of segment being transmitted and to determine if the proper segment sequence has been followed for a particular type of incident submission. Each incident may include SEGTYPE only in the range of 1-8. Active submissions contain only SEGTYPE 1-7, with SEGTYPE 8 reserved for actions involving incidents which occurred and were reported before the agency began NYS NIBRS participation (Inactive or Time Window incidents).

Valid SEGTYPE codes are:

1	Administrative Segment
2	Offense Segment
3	Property Segment
4	Offender Segment
5	Victim Segment
6	Arrestee Segment
7	Arrest Charge Segment
8	Time Window Segment

These codes are normally generated by your RMS when creating the monthly file for submission. If the correct data was entered but the codes are wrong, contact your RMS vendor or call DCJS.

See Transmission Data Element #TD1 SEGTYPE and Data Transmission Specifications.

618 An Initial or Replace Active Incident must include only one Administrative Segment

If an incident is either an Initial Active Incident (SEGACT = I) or a Replace Active Incident (SEGACT = R), it must contain a single Administrative Segment (SEGTYPE 1).

These codes are normally generated by your RMS when creating the monthly file for submission. For further help, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

620 An Initial or Replace Active Incident must include at least one Offense Segment

If an incident is either an Initial Active Incident (SEGACT = I) or a Replace Active Incident (SEGACT = R), it must contain a single Offense Segment (SEGTYPE 2). Every active incident submitted must have at least one offense which will generate the Offense Segment. These codes are normally generated by your RMS when creating the monthly file for submission. For further help, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

622 An incident can have no more than 10 Offense Segments

The NYS NIBRS database is designed to capture a maximum of 10 offenses per incident. If a single incident has more than 10 offenses, choose the 10 most important or most serious offenses to record. Your RMS should limit the number of Offense Segments to ten when entering data. For further help, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE and Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. **ERROR MESSAGE AND EXPLANATION**
624 **Duplicate Offense Segments are not allowed; every OFFENSE NUMBER in an incident must be unique**

If more than one OFFENSE SEGMENT (SEGTYPE = 2) is present in an incident, each must have a unique OFFENSE NUMBER. These numbers are normally generated by your RMS when creating the monthly file for submission. For further help, contact your RMS vendor or call DCJS.

See Data Element #12 OFFENSE NUMBER.

626 **INCIDENT/COMPLAINT OFFENSE and INCIDENT LARCENY TYPE combination is not unique for the incident**

Each OFFENSE SEGMENT must contain a unique combination of INCIDENT/COMPLAINT OFFENSE and INCIDENT LARCENY TYPE. The combination identifies specific offense types. Do not count how many times an offense type occurred in the incident.

EXAMPLE: Young people steal money from vending machines throughout a building. There was more than one larceny from a vending machine, but the incident must contain only one pairing of the same larceny law citation with an INCIDENT LARCENY TYPE of *Theft from a Coin-Operated Machine or Device* (05).

See Data Elements #13 INCIDENT/COMPLAINT OFFENSE and #14 INCIDENT LARCENY TYPE.

630 **Each Property Segment in an incident must have a unique PROPERTY INVOLVEMENT**

The Property Segment of an incident must include an entry in PROPERTY INVOLVEMENT which indicates what happened to property involved in the crime. Only one type or involvement is allowed in a segment. When more than one segment is present, each of them must have a unique PROPERTY INVOLVEMENT.

EXAMPLE: A thief stole tools from a garage and then set the garage afire. Police apprehended him and recovered the stolen property into custody. There would be three Property Segments, each with a different PROPERTY INVOLVEMENT: *Stolen/etc.* (07), *Burned* (02), and *Recovered*.(05).

See Data Element #22 PROPERTY INVOLVEMENT.

632 **A maximum of six Property Segments per incident is allowed**

Your RMS should be programmed to limit the number of Property Segments to six when entering data.

See Transmission Data Element #TD1 SEGTYPE and Data Transmission Specifications.

634 **An Initial or Replace Active Incident must include at least one Offender Segment**

If an incident is either an Initial Active Incident (SEGACT = I) or a Replace Active Incident (SEGACT = R), it must contain at least one Offender Segment (SEGTYPE 4). Every active incident submitted must have at least one offender.

If the offender is unknown, it should be entered as such to generate the required segment. The information can be updated later if the identity of the offender is established.

The SEGACT and SEGTYPE codes are normally generated by your RMS when creating the monthly file for submission. If an offender has been reported and these codes are not correct, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

636 Duplicate OFFENDER NUMBER in incident is not allowed; each must be unique

Every incident must include an Offender Segment containing an OFFENDER NUMBER and other identifying information. Normally the agency RMS automatically counts the number of offenders entered and assigns a number from 001 to a maximum of 099.

If more than one offender has been correctly entered and the numbers are not unique, contact the RMS vendor for further help. If the offender is unknown and reported as such, the field should contain 999 until the offender is identified and the incident is updated.

See Data Element #32 OFFENDER NUMBER.

638 A maximum of 99 OFFENDER SEGMENTS is allowed in an incident

If your RMS doesn't allow up to 99 offenders or allows greater than 99, contact your RMS vendor for further help.

See Data Element #32 OFFENDER NUMBER.

640 If OFFENDER NUMBER is Unknown, no other offenders are allowed for the incident

If incident has an OFFENDER NUMBER 999 for Unknown, no other Offender Segments can be included in the incident. If your RMS allows more than one Unknown offender, contact the RMS vendor for further help.

See Data Element #32 OFFENDER NUMBER.

642 At least one Victim Segment is required for an Initial Active or Replace Active Incident

Every incident must have at least one victim reported. Entering the VICTIM NUMBER and identifying data creates the required Victim Segment. That segment contains all the fields required to describe the victim.

See Transmission Data Element #TD1 SEGTYPE and NYS NIBRS Data Transmission Specifications.

644 Duplicate VICTIM NUMBER in incident is not allowed; each must be unique

Every incident must include at least one Victim Segment containing a VICTIM NUMBER and other identifying information. Normally the agency RMS automatically counts the number of victims entered and assigns a number from 001 to a maximum of 999. A separate Victim Segment must be submitted for each numbered victim. If multiple victims have been correctly entered and the numbers are not unique, contact your RMS vendor for further help.

See Data Element #38 VICTIM NUMBER, Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

646 Maximum of 999 Victim Segments per incident

No more than 999 victims may be included in any one incident. Each of the victims must be assigned a unique victim number from 001 to 999. A separate Victim Segment must be submitted for each numbered victim. No two segments may contain the same VICTIM NUMBER for the incident. Most agency RMS will automatically assign and count the number of victim segments centered.

See Data Element #38 VICTIM NUMBER, Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

648 Duplicate ARRESTEE NUMBER in incident is not allowed; each must be unique

Every Arrestee must have an ARRESTEE NUMBER. If more than one arrestee is reported for an incident, each must be assigned a unique ARRESTEE NUMBER. Normally the agency RMS automatically counts the number of arrestees entered and assigns a number from 01 to a maximum of 99. A separate Arrestee Segment must be submitted for each numbered arrestee. If multiple arrestees have been correctly entered and the numbers are not unique, contact the RMS vendor for further help.

See Data Element #51 ARRESTEE NUMBER, Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

650 An INCIDENT CASE STATUS of a Clearance by Exceptional Means does not allow the inclusion of an Arrestee Segment

If the INCIDENT CASE STATUS was one of the valid Clearance by Exceptional Means choices, no arrests may be reported for the incident and no Arrestee Segments may be present. To clear an offense by exceptional means, all of the following four conditions must be met:

- the investigation must have established the identity of at least one offender.
- sufficient probable cause must have been developed to support the arrest, charging, and prosecution of the offender.
- the exact location of the offender must be known so that an arrest could be made; and
- one of the following reasons outside the control of law enforcement prevents the arrest:

- 10 = Death of Offender
- 11 = Prosecution Declined
- 12 = Extradition Denied
- 13 = Victim Refuses to Cooperate
- 14 = No Court Referral (Juvenile Only).

See Data Element #7 INCIDENT CASE STATUS, Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

652 An INCIDENT CASE STATUS of Clearance by Arrest requires an Arrestee Segment

If the INCIDENT CASE STATUS was either *Cleared by Arrest - Adult* (01), or *Cleared by Arrest – Juvenile* (02), an arrest must be reported for the incident on a valid Arrestee Segment.

The sole exception to this requirement for an arrest occurs when the Segment Action requested in the SEGACT field is Delete Segment (D). This means that a submission to delete a previously existing incident is submitted to DCJS, so no Arrestee Segment will be included.

See Data Element #7 INCIDENT CASE STATUS, Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and NYS NIBRS Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

653 An INCIDENT CASE STATUS of No Court Referral (Juvenile Only) requires OFFENDER AGE under 18

If the INCIDENT CASE STATUS was No Court Referral (Juvenile Only) (14), there must be at least one Offender Segment where OFFENDER AGE is under 18, or if age was reported as a range, the truncated average age must be under 18.

See Data Elements #7 INCIDENT CASE STATUS, #33 OFFENDER AGE, Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

654 The maximum number of Arrestee Segments allowed is 99

If more than one arrest is reported for an incident, each arrestee must be assigned a unique ARRESTEE NUMBER from 01 to 99. A separate Arrestee Segment must be submitted for each numbered arrestee. Within an incident, no two segments may contain the same ARRESTEE NUMBER. The number of Arrestee Segments that can be attached to any one incident is limited to 99. Most Record Management Systems will automatically assign and count the number of arrestee segments entered.

See Data Element #51 ARRESTEE NUMBER, Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

656 Each Arrestee Segment must contain a unique combination of ARREST CHARGE and ARREST LARCENY TYPE

Each Arrestee Segment submitted must contain at least one Arrest Charge Segment. If more than one Arrest Charge segment is reported for an arrestee, each must have a unique combination of the two fields ARREST CHARGE and ARREST LARCENY TYPE.

If a larceny offense is being charged, the ARREST LARCENY TYPE field must contain a valid type of larceny. Larceny Type is a classification of types of theft used in crime and arrest reporting and is not identified by Penal Law citation.

If no larceny offense was involved, use *Not Applicable* (77) in the ARREST LARCENY TYPE field. Use of *Not Reported* (88) and *Unknown* (99) should be minimized.

See Data Elements #67 ARREST CHARGE and #68 ARREST LARCENY TYPE, and NYS NIBRS Data Transmission Specifications.

658 The maximum number of Arrest Charge Segments allowed is 16

The maximum number of Arrest Charge Segments that may be associated with an individual's Arrestee Segment is 16.

See Transmission Data Element #TD1 SEGTYPE, and NYS NIBRS Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

660 ARRESTEE/CHARGE LINK must link the Arrest Charge Segment to the Arrestee Segment last preceding it

Each Arrestee Segment submitted requires at least one Arrest Charge Segment following it, up to a maximum of 16. Each charge should be linked to the last preceding Arrestee Segment. The ARRESTEE NUMBER which was entered into ARRESTEE/CHARGE LINK must also link to the same arrestee, to confirm the match.

See Data Elements #51 ARRESTEE NUMBER, #66 ARRESTEE/CHARGE LINK, and NYS NIBRS Data Transmission Specifications.

662 Arrestee Segment is missing corresponding Arrest Charge Segment

Each Arrestee Segment must contain at least one Arrest Charge Segment. Enter the corresponding ARRESTEE NUMBER in the ARRESTEE/CHARGE LINK on the Arrest Charge Segment(s) to link each arrestee to the Arrest Charge Segments that pertain to him or her. This segment must also contain the ARREST CHARGE and ARREST LARCENY TYPE fields.

See Data Elements #51 ARRESTEE NUMBER, #66 ARRESTEE/CHARGE LINK, #67 ARREST CHARGE, and #68 ARREST LARCENY TYPE, and NYS NIBRS Data Transmission Specifications.

664 Arrestee Segment must be the first segment when adding an arrestee

If the agency submission file requests DCJS to add an arrestee (SEGACT is A) to an active incident previously reported, the first segment submitted for the incident must be an Arrestee Segment (SEGTYPE 6). SEGACT is used to inform DCJS processing programs of the desired action to be taken for a particular segment submission.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and NYS NIBRS Data Transmission Specifications.

666 SEGTYPEs one through five of an incident must occur in ascending order within that incident

SEGTYPE codes are used to identify the type of segment being transmitted, to determine if the proper segment submission sequence has been followed for the type of incident submission (e.g., an initial submission for an active incident), and to compute the HASH TOTAL used on the Trailer Segment to verify DCJS has accurately read an agency's submission file. These codes are normally generated by the RMS when creating the monthly submission file. If the correct data was entered but codes are wrong, contact the RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, #TD9 HASH TOTAL, and NYS NIBRS Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

668 An Initial or Replace Active Incident requires Arrestee Segments to follow either a Victim Segment or an Arrest Charge Segment

This error message appears when the segment order in the submitted incident is invalid for either an Initial Active Incident (SEGACT is I) or a Replace Active Incident (SEGACT is R). Both require all Arrestee Segments (SEGTYPE 6) follow either a Victim Segment (SEGTYPE 5) or an Arrest Charge Segment (SEGTYPE 7).

SEGTYPE codes are used to identify the type of segment being transmitted, to determine if the proper segment submission sequence has been followed for the codes type of incident, and to verify that DCJS has accurately read a local agency file submission. These codes should be generated by the RMS when creating the monthly submission file. If the correct data was entered but the codes are wrong, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and NYS NIBRS Data Transmission Specifications.

670 Add Arrestee submission requires that Arrest Charge Segments follow either an Arrestee Segment or another Arrest Charge Segment

This error message results when the segment order in the incident submitted is invalid. Each Arrest Charge Segment (SEGTYPE 7) to be added to a previously reported incident must follow either an Arrestee Segment (SEGTYPE 6) or another Arrest Charge Segment. These codes are generated by the RMS when creating the monthly file for submission. If the correct data was entered but codes are wrong, contact your RMS vendor or call DCJS.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and NYS NIBRS Data Transmission Specifications.

672 Each Arrestee Segment must have an Arrest Charge Segment as the next segment in the incident

Segment order is invalid for adding an Arrestee. Each Arrestee Segment (SEGTYPE 6) must be followed by an Arrest Charge Segment (SEGTYPE 7) as the next segment in the incident.

See Transmission Data Element #TD1 SEGTYPE and NYS NIBRS Data Transmission Specifications.

674 Initial or Updating Time Window requires that the last segment in the incident be Time Window

An incident submitted as either an Initial Inactive Incident (Time Window) (SEGACT is W) or as an Update Inactive Incident (Time Window Update) (SEGACT is U) requires a Time Window Segment (SEGTYPE 8) as its final segment.

These codes are generated by the RMS when creating the monthly file for submission. If the correct data was entered but codes are wrong or out of order, contact the RMS vendor or DCJS.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and NYS NIBRS Data Transmission Specifications.

NO. ERROR MESSAGE AND EXPLANATION

676 VICTIM/OFFENSE LINK requires an Offense Segment with same OFFENSE NUMBER

Every occurrence of a VICTIM/OFFENSE LINK must have a corresponding Offense Segment with an OFFENSE NUMBER containing the identical number. Links reported as Not Applicable are the only exception to this rule.

Each victim must be linked to at least one and no more than ten offenses. The first occurrence of the VICTIM/OFFENSE LINK field must be filled with a two-digit OFFENSE NUMBER, from 01 to 75, assigned to an offense perpetrated against the victim. If the number is 1 through 9, be sure to zero-left-fill the field, e.g., 06, 03, 01.

When fewer than 10 offenses are present for the victim, all the unused occurrences following the last offense entered must be coded as Not Applicable.

See Data Elements #12 OFFENSE NUMBER, #39 VICTIM/OFFENSE LINK, and NYS NIBRS Data Transmission Specifications.

678 Every Offense Segment present in the incident must be linked through a VICTIM/OFFENSE LINK to at least one Victim Segment

Every valid Offense Segment must have a corresponding Victim Segment, with a VICTIM/OFFENSE LINK containing a number identical to its OFFENSE NUMBER.

Each victim must be linked to at least one and no more than ten offenses. The first occurrence of the VICTIM/OFFENSE LINK field must be filled with a two-digit OFFENSE NUMBER assigned to an offense perpetrated against the victim. When fewer than 10 offenses are present for the victim, all the unused occurrences following the last offense entered must be coded as Not Applicable.

See Data Elements #12 OFFENSE NUMBER and #39 VICTIM/OFFENSE LINK: Transmission Data Element #TD1 SEGTYPE and NYS NIBRS Data Transmission Specifications.

680 Only one VICTIM TYPE of Society/Public is allowed per incident

There cannot be more than one Victim Segment containing a VICTIM TYPE of Society/Public in a single incident.

See Data Element #40 VICTIM TYPE, and NYS NIBRS Data Transmission Specifications.

682 BIAS CRIME TYPE requires a valid Hate Crime Offense. See NYS NIBRS Error Messages and Explanations.

When the Bias Crime Type is a specified bias motivation, then at least one of the charges must be PL 240.30 03, PL 240.31 all subs: (01, 02, 03, 04, and 05), PL 490.10, 490.15, 490.20, 490.25, 490.27, 490.28 490.30, 490.35, 490.37, 490.40, 490.45, 490.47, 490.50, 490.55, or a valid Hate Crime as defined by PL 485.00 (See chart in Appendix B).

See Data Element #11-BIAS CRIME TYPE, Data Element #13-INCIDENT/COMPLAINT OFFENSE, PL 240.30 03, PL 240.31 all subs: (01, 02, 03, 04, and 05), PL 490.10, 490.15, 490.20, 490.25, 490.27, 490.28 490.30, 490.35, 490.37, 490.40, 490.45, 490.47, 490.50, 490.55, or a valid Hate Crime as defined by PL 485.00 (See chart in Appendix B).

683 INCIDENT /COMPLAINT OFFENSE is a valid hate crime and requires a specific bias in BIAS CRIME TYPE (occurrence 1)

If an INCIDENT/COMPLAINT OFFENSE is PL 240.30 03, PL 240.31 (01, 02, 03, 04, 05), or a valid Hate Crime as defined by PL 485.00 (See chart in Appendix B), then the first occurrence of Bias Crime Type must not be *No Bias/Not Applicable (77)*, *Not Reported by Agency (88)*, or *Motivation of the Perpetrator Unknown (99)*.

See Data Element #11-BIAS CRIME TYPE, Data Element #13-INCIDENT/COMPLAINT OFFENSE, PL 240.30 03, PL 240.31 all subs: (01, 02, 03, 04, and 05), or a valid Hate Crime as defined by PL 485.00 (See chart in Appendix B)

**The NYS Coded Law file has a Hate Crime Indicator column. If the Hate Crime indicator = 1 or 2, then the offense is a hate crime. If the Hate Crime Indicator = 0, the offense is not a hate crime.*

684 VICTIM TYPE of Society/Public must be linked only to Crime Against Society.

A VICTIM TYPE of Society/Public requires that every corresponding offense to which it is linked must have an INCIDENT/COMPLAINT OFFENSE field containing a NYS law citation which is classified as one of the following:

- 35A - Drug/Narcotic Violations
- 35B - Drug Equipment Violations
- 39A - Betting/Wagering
- 39B - Operating/Promoting/Assisting Gambling
- 39C - Gambling Equipment Violations

688 Time Window Administrative Segment requires INCIDENT CASE STATUS of Clearance by Exceptional Means and valid date in INCIDENT EXCEPTIONAL CLEARANCE DATE

An Administrative Segment submitted as either an Initial Inactive Incident (Time Window) or as an Update Inactive Incident (Time Window Update) must contain a valid INCIDENT EXCEPTIONAL CLEARANCE DATE and an INCIDENT CASE STATUS containing one of the exceptional clearances:

- 10 = Death of Offender
- 11 = Prosecution Declined
- 12 = Extradition Denied
- 13 = Victim Refuses to Cooperate

712 Recovered Property must also be submitted as Stolen, except when the incident includes a Counterfeiting/Forgery Offense or Stolen Property Offense

Normally no property may be reported as recovered which has not been previously reported as stolen. However, several different sets of circumstances can change how it should be reported:

- 1) If the property was stolen and recovered in the same active case and is considered a single incident, both must be reported together. The Property Segment contains a PROPERTY INVOLVEMENT of *Recovered* (05) and identifies a specific PROPERTY TYPE. It also must be paired with a separate Property Segment which has a PROPERTY INVOLVEMENT of *Stolen/etc.* (07), and the same PROPERTY TYPE as on the recovered segment.
- 2) The only exceptions to the above rule which do not require a corresponding stolen property segment occur when reporting Counterfeiting/Forgery, or Stolen Property Offenses; or when reporting the PROPERTY TYPE as *Not Applicable* (77), *Not Reported* (88), or *Unknown* (99). Use of *Not Reported* (88) and *Unknown* (99) should be avoided if possible. If property has been recovered, the general type of property should be known and reported.
- 3) If the stolen property was previously reported by your agency to DCJS in another incident on an earlier date, the original incident should be Updated with a new Property Segment to show the property recovery and any other changes such as arrests and clearance of the case. Do not submit a new incident.
- 4) If the stolen property was previously reported by your agency to DCJS in the older UCR Summary system, it falls outside the Time Window of current active IBR cases. Only a minimum amount of information on property recovery still needs to be reported to DCJS NYS NIBRS as an inactive Time Window case. This could be submitted as a Recovered Property Only, Exceptional Clearance with Recovered Property, or an Arrest with Recovered Property.
- 5) If the recovered property was never reported stolen by your agency and you have recovered stolen property originally reported by another police agency, do not submit an incident with the original offense. This would duplicate the previous reporting and leave the other agency's case with unrecovered stolen property. After notifying the other agency, your agency should submit a current incident containing a possession of Stolen Property offense, and any other new offenses that may have occurred during the recovery, to show the recovery work done by your agency.

724 Recovered PROPERTY VALUE cannot be greater than its value when stolen and cannot be Not Applicable or Unknown when stolen PROPERTY VALUE is known

If an incident has PROPERTY INVOLVEMENTs of both *Stolen* (07) and *Recovered* (05), each occurrence of PROPERTY TYPE associated with the recovered property must also appear with the stolen property. In addition, the PROPERTY VALUE of the stolen property must be greater than or equal to the value of the recovered property.

The exceptions to this rule are incidents reporting 250 (*Counterfeiting/Forgery*), or 280 (*Stolen Property Offense*), as well as incidents in which PROPERTY TYPE is *Not Applicable* (77), *Not Reported* (88), or *Unknown* (99).

790 INCIDENT CASE STATUS of Cleared by Arrest - Adult requires at least one arrestee be g 18 years of age or older

An offense is considered cleared by arrest when at least one person is arrested, charged with the commission of an offense, and turned over to the court for prosecution. In incidents, which involve multiple arrests, *Cleared by Arrest-Adult* (01) requires that at least one of those arrested is 18 years of age or older.

See Data Elements #7 INCIDENT CASE STATUS and #61 ARRESTEE AGE.

792 INCIDENT CASE STATUS of Cleared by Arrest - Juvenile requires that all Arrestees in incident must be less than 18 years of age

An incident is counted as cleared by juvenile arrest when one or more juveniles is cited for a crime for which an adult could be arrested if engaged in the same activity, regardless of case outcome. This includes the entire range of cases in which law enforcement acts officially – from cases that are referred for prosecution in family court or even adult court, to cases handled by the department and not carried forward for prosecution or probation. If the activity is a crime, and police intervene, it is a juvenile arrest even when the official act is an appearance ticket or a conversation with, and release to, parents.

In incidents involving multiple arrests, *Cleared by Arrest-Juvenile* (02) requires that all those arrested are less than 18 years of age. If multiple arrests in an incident include a mix of juveniles and adults, the INCIDENT CASE STATUS is *Cleared by Arrest – Adult* (01).

800 Time Window submitted with Administrative, Property, and Time Window Segments, but no Arrestee Segment, requires TIME WINDOW TYPE of Exceptional Clearance with Recovered Property

If an incident has one Administrative Segment (SEGTYPE 1), one Property Segment (SEGTYPE 3), one Time Window Segment (SEGTYPE 8), and no Arrestee Segment (SEGTYPE 6), the TIME WINDOW TYPE must be *Exceptional Clearance with Recovered Property* (4).

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

802 Time Window submitted with Property, Arrestee, Arrest Charge, and Time Window Segments, but no Administrative Segment, requires TIME WINDOW TYPE of Arrest with Recovered Property

If an incident has one Property Segment (SEGTYPE 3), at least one Arrestee Segment (SEGTYPE 6) followed by at least one Arrest Charge (SEGTYPE 7) and a Time Window Segment (SEGTYPE 8), and no Administrative Segment, the TIME WINDOW TYPE must be *Arrest with Recovered Property* (5).

See Transmission Data Elements #TD1 SEGTYPE and # TD5 TIME WINDOW TYPE.

804 TIME WINDOW TYPE of Exceptional Clearance Only requires one Administrative Segment and one Time Window Segment only

If TIME WINDOW TYPE is *Exceptional Clearance Only* (1), only two segments may be present. The first must be an Administrative Segment (SEGTYPE 1) followed by a Time Window Segment (SEGTYPE 8). No other segments may be included in the incident.

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

806 TIME WINDOW TYPE of Recovered Property Only requires one Property Segment and one Time Window Segment only

If TIME WINDOW TYPE is *Recovered Property Only* (2), only two segments may be present. The first must be Property Segment (SEGTYPE 3) followed by a Time Window Segment (SEGTYPE 8). No other segments may be included in the incident.

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

808 TIME WINDOW TYPE of Arrest Only requires at least one each of Arrestee and Arrest Charge Segments followed by a Time Window Segment

If TIME WINDOW TYPE is *Arrest Only* (3), three segment types are required: at least one Arrestee Segment (SEGTYPE 6) followed by at least one Arrest Charge Segment (SEGTYPE 7) and a Time Window Segment (SEGTYPE 8).

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

810 TIME WINDOW TYPE of Arrest Only or Arrest with Recovered Property requires that every Arrestee Segment be followed by at least one Arrest Charge Segment.

If TIME WINDOW TYPE is *Arrest Only* (3) or *Arrest with Recovered Property* (5), each Arrestee Segment (SEGTYPE 6) must be followed by at least one Arrest Charge Segment (SEGTYPE 7).

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

812 TIME WINDOW TYPE of Exceptional Clearance with Recovered Property requires one each of Administrative, Property and Time Window Segments

If TIME WINDOW TYPE is *Exceptional Clearance with Recovered Property* (4), three segment types are required: an Administrative Segment (SEGTYPE 1), followed by a Property Segment (SEGTYPE 3), and a Time Window Segment (SEGTYPE 8).

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

814 TIME WINDOW TYPE of Arrest with Recovered Property requires Property, Arrestee, Arrest Charge and Time Window Segments

If TIME WINDOW TYPE is *Arrest with Recovered Property* (5), four segment types are required. The first must be a single Property Segment (SEGTYPE 3). Then there must be at least one segment each of Arrestee (SEGTYPE 6) and Arrest Charge (SEGTYPE 7), followed by a Time Window Segment (SEGTYPE 8).

See Transmission Data Elements #TD1 SEGTYPE and #TD5 TIME WINDOW TYPE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

816 TIME WINDOW TYPE of Exceptional Clearance Only, or Exceptional Clearance with Recovered Property requires a Clearance by Exceptional Means in the INCIDENT CASE STATUS

If the TIME WINDOW TYPE is *Exceptional Clearance Only* (1), or *Exceptional Clearance with Recovered Property* (4), the INCIDENT CASE STATUS must be one of the following valid Clearance by Exceptional means choices: *Death of Offender* (10), *Prosecution Declined* (11), *Extradition Denied* (12), *Victim Refuses to Cooperate* (13), *No Court Referral [Juvenile Only]* (14).

The EXCEPTIONAL CLEARANCE DATE must also contain a valid date and the TIME WINDOW CLEARANCE INDICATOR must be Not Applicable (7).

See Transmission Data Elements #TD6 TIME WINDOW TYPE, #TD7 CLEARANCE INDICATOR, Data Elements #7 INCIDENT CASE STATUS and # 8 INCIDENT EXCEPTIONAL CLEARANCE DATE.

820 Initial or Updating Time Window submission with a Property Segment (SEGTYPE = 3) must have a PROPERTY INVOLVEMENT of Recovered

An incident submitted as either an Initial Inactive Incident (Time Window) or as an Update Inactive Incident (Time Window Update) may contain at most, one Property Segment (SEGTYPE 3). This segment must include a PROPERTY INVOLVEMENT of *Recovered* (05).

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and Data Element #22 PROPERTY INVOLVEMENT.

822 Duplicate incidents not allowed; Active or Time Window Incident already exists on DCJS database

An Initial Active Incident (I) or Initial Inactive Incident (W) submission will not be accepted when the same action already exists on the DCJS database for that ORI NUMBER and INCIDENT/ COMPLAINT NUMBER combination.

See Transmission Data Element # TD2 SEGMENT ACTION, Data Elements #1 ORI NUMBER and #2 INCIDENT/COMPLAINT NUMBER.

824 Cannot add Arrestee Segment to an incident not already on file

Incidents submitted containing only Arrestee and Arrest Charge Segments with a SEGACT of A for adding an arrestee to an active incident cannot be accepted unless the crime incident is already posted to the DCJS database. An arrestee cannot be added when there is no prior posted crime incident to which the arrest can be linked.

See Transmission Data Element # TD2 SEGMENT ACTION and Data Transmission Specifications.

825 ARREST DATE must be greater than or equal to INCIDENT REPORT DATE

An Arrestee Segment (SEGTYPE 6) submitted for adding an arrestee to an active incident (SEGACT of A) must have a valid ARREST DATE which is on or after the INCIDENT REPORT DATE of the original incident on the database.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and Data Elements #5 INCIDENT REPORT DATE and #55 ARREST DATE.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

826 Deleting an inactive incident on database requires matching TIME WINDOW TYPE

A Time Window Segment submitted to Delete an inactive incident (SEGACT is D) must have a TIME WINDOW TYPE which matches that of the incident previously posted to the database. For example, if the Time Window incident previously posted included an Arrest with Recovered Property segment, the later Delete submission for that incident must also contain a TIME WINDOW TYPE of Arrest with Recovered Property.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT, and #TD6 TIME WINDOW TYPE, and Data Transmission Specifications.

828 Time Window Delete transaction requires matching Inactive Incident on file

A Time Window Segment submitted to Delete an inactive incident (SEGACT is D) must match an Initial Inactive Incident (SEGACT is W) or an Update Inactive Incident (SEGACT is U) on the database.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and Data Transmission Specifications.

830 Deleting an active incident from the database requires that the Delete Segment's INCIDENT REPORT DATE match the database incident's INCIDENT REPORT DATE

An Administrative Segment submitted to Delete a previously reported active incident must include an INCIDENT REPORT DATE that matches that of the incident already on the database. In most cases this will be the same as the INCIDENT OCCURRENCE DATE.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, Data Elements #3 INCIDENT OCCURRENCE DATE and #5 INCIDENT REPORT DATE, and Data Transmission Specifications.

832 Administrative Deletion requires an active incident on database

An Administrative Segment submitted to administratively Delete an incident requires that the incident on the database have been posted as either an Initial Active Incident (SEGACT is I) or a Replace Active Incident (SEGACT is R). Inactive incidents must be deleted with a Time Window segment.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

834 Incident was posted, but it should have been submitted as Initial Active Incident, not as Replace Active Incident

When an incident arrives as a Replace Active Incident (R), the NYS NIBRS system searches the database for a previously submitted matching incident to which any new information will be attached. When no such incident already exists, the "replacement" is edited for errors and if it passes, it is posted to the database. The above message is then generated. It should have been submitted as an Initial incident (I).

The present incident was safely submitted and posted this time, but the process indicates trouble for other incidents if the practice continues. This incident may have been submitted previously and rejected because of data errors. It would not have been posted by DCJS, and if not corrected and resubmitted, would still be unknown to DCJS. If that is the case, please be sure to correct any incidents that are returned with errors that have caused them to be rejected, before submitting "Replace" incidents.

If the incident was correctly entered as a new or "Initial" incident and the codes were still generated incorrectly by your RMS when creating the monthly file for submission, contact the RMS vendor.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and Data Transmission Specifications.

836 Time Window incident was posted, but it should have been submitted as Initial Inactive Incident, not as Update to Inactive Incident

When an incident arrives as an Update Inactive (U), the NYS NIBRS system searches the database for a previously submitted matching incident to which any new information will be attached. When no such incident already exists, the "update" is edited for errors and if it passes, it is posted to the database. The above message is then generated. It should have been submitted as an Initial Inactive Incident (W).

The present incident was safely submitted and posted this time, but the process indicates trouble for other incidents if the practice continues. This incident may have been submitted previously and rejected because of data errors. It would not have been posted by DCJS, and if not corrected and resubmitted, would still be unknown to DCJS. If that is the case, please be sure to correct any incidents that are returned with errors that have caused them to be rejected, before submitting "Replace" incidents.

If the incident was correctly entered as a new or "Initial" incident and the codes were still generated incorrectly by your RMS when creating the monthly file for submission, contact the RMS vendor.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, and Data Transmission Specifications.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

838 An Active incident must be on the DCJS database before it can be Deleted

Deleting an Active Incident involves matching the Delete incident information with an active incident on the DCJS database. When the incident is not present, the attempted transaction is rejected, nothing is deleted, and this error message is generated.

An Administrative Segment submitted with a SEGACT of D will not be subjected to the full edit checks normally applied. Given that the purpose of a delete transaction is to remove an incident from the NYS NIBRS database, only a limited set of edits is necessary to ensure that the incident to be deleted can be identified. ORI NUMBER, INCIDENT/COMPLAINT NUMBER, and INCIDENT REPORT DATE must match the incident already on the database and the incident must be active to be deleted by an Administrative Segment.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, Data Elements #1 ORI NUMBER, #2 INCIDENT/ COMPLAINT NUMBER, and #5 INCIDENT REPORT DATE, and Data Transmission Specifications.

839 Time Window submitted for an incident already on database. Data must be resubmitted as an active incident

Cannot submit incident with SEGACT = *W* (Initial "Inactive" Incident) Submission or *U* (Update to "Inactive" Incident Submission) when *I* (Initial "Active" Incident Submission) or *R* (Replace "Active" Incident Submission) incident already exists on DCJS database for that ORI NUMBER and that Data Element #2- INCIDENT/COMPLAINT NUMBER.

See Transmission Data Elements #TD1 SEGTYPE and #TD2 SEGACT, Data Elements #1 ORI NUMBER, #2 INCIDENT/ COMPLAINT NUMBER, and #5 INCIDENT REPORT DATE, and Data Transmission Specifications.

840 A Time Window incident must be on the DCJS database before it can be Deleted

Deleting a Time Window Incident involves matching the Delete incident information with an inactive incident on the DCJS database. When the incident is not present, the attempted transaction is rejected, nothing is deleted, and this error message is generated.

A Time Window Segment submitted with SEGACT of D will not be subjected to the full edit checks normally applied. Given that the purpose of a delete transaction is to remove an incident from the NYS NIBRS database, only a limited set of edits is necessary to ensure that the incident to be deleted can be identified. ORI NUMBER, INCIDENT/COMPLAINT NUMBER, and TWTYPE must match the incident already on the database and the incident must be inactive to be deleted by a Time Window Segment.

See Transmission Data Elements #TD1 SEGTYPE, #TD2 SEGACT and #6 TIME WINDOW TYPE, Data Elements #1 ORI NUMBER and #2 INCIDENT/ COMPLAINT NUMBER, and Data Transmission Specifications.

942 – 1026 These error messages appear when the reported DRUG TYPE does not match the section of law cited in INCIDENT/COMPLAINT OFFENSE. The remedy for this error is to correct either the law section or the choice of drug name in DRUG TYPE.

Each message specifies one controlled substance or class of controlled substances as defined in the Public Health Law. Criminal possession and sale of these substances are defined in Penal Law Articles 220 and 221. The following explanation is written as an example using the citation for Cocaine, but its text applies (with appropriate changes in PL section and drug name) to error messages 942 – 1026. Even the See Data Elements references apply as in the sample to all these messages.

Every one of the citations involves property, pertains only to completed offenses, and would be followed by an “*” in the text of its explanation because it requires property information. The edits creating these messages are run only if the third occurrence of DRUG TYPE is not reported as “Over 3 Drug Types,” since DRUG TYPE might not have been reported.

NYS NIBRS Error Messages and Explanations

NO. ERROR MESSAGE AND EXPLANATION

942 NYS law citation of PL 220.06.05 requires seizure of Cocaine in DRUG TYPE

This incident contains an INCIDENT/COMPLAINT OFFENSE of PL 220.06.05* and a PROPERTY INVOLVEMENT of *Seized* (06). Since this combination denotes the seizure of Cocaine, at least one of the up-to-three occurrences of DRUG TYPE must contain *Cocaine Hydrochloride* (10), *Crack* (11), or *Other Coca Derivatives* (19). The DRUG TYPE field is used only to identify the type of drugs when there is a seizure; otherwise enter *None/Not Applicable* (00).

If more than three drug types are seized in the incident, the two most important are to be reported specifically and the third occurrence is entered as *Over Three Drug Types* (97). The reporting agency determines the most important drugs in such cases, based on the quantity, value, and deadliness of the drugs seized.

EXAMPLE: In a drug case, the following drugs were seized:

Crack - 1.5 kilograms
Marijuana - 2.125 pounds
Morphine - 2.0 liquid ounces
Valium - 500 capsules

The *Crack* (11) was entered in the first occurrence of DRUG TYPE, and the *Morphine* (02) in the second occurrence. The third occurrence was reported as *Over Three Drug Types* (97). The Marijuana and Valium were not individually reported to DCJS but were written up in the incident notes for agency case records.
